

# make this cube-style cat tree

Your cat will love this easy-to-make contemporary cat tree.

## *you will need:*

- One sheet of 16mm-thick mdf cut into: 3 at 450mm x 300mm for the fronts; 6 at 418mm x 284mm for tops and bottoms; 6 at 300mm x 284mm for the ends. The finished box size is 450mm x 300mm x 300mm. None of the boxes have backs
- 500ml Resene Quick Dry primer undercoat
- 3 testpots of your choice of colours – we used Resene Half Gravel, Resene Atmosphere and Resene Black Haze
- Paint brush
- Skill saw
- Jig saw
- Screwdriver and 30mm screws
- Sandpaper
- Filler and small broad knife
- 4 L-brackets and screws

 Resene Half Gravel

 Resene Black Haze

# CoolPlast™

**Step 1:** Cut out the pieces for the box or have your supplier cut them for you. Assemble the boxes using 30mm screws.

**Step 2:** Cut out 220mm squares for the entry and exit holes using a jig saw. Ours are set into the corner, 40mm from the edges. Lightly sand the edges of the holes.

**Step 3:** Fill all of the screw holes, then undercoat the boxes using Resene Quick Dry primer undercoat.

**Step 4:** Apply topcoats using Resene colours of your choice.

**To finish:** Using the L-brackets, fix the bottom box onto the wall. Screw the middle box to the bottom one, setting it about 150mm off the wall, then measure and fix the L-brackets to the wall for the top box.

## Innovative Protection

Extend your choice and depth of colours like never before with CoolPlast™ & Resene CoolColour technology.

After development and field testing, over the past 10 years, Resene Construction Systems are pleased to introduce the first CoolPlast™ coating system with our INTEGRA Lightweight Concrete, Graphex, Brick, Block and Masonry Plaster Facade Systems.

Now you can select dark colours for your new Rockcote and Plaster Systems external plaster façade systems with confidence.
