

# Paint Effects

## Gilding

Gilding adds glamour to ordinary household items giving them a sense of history and opulence.

### You will need:

- Candlesticks made of plaster, wood, metal or papier mache
- Flat artist bristle brush
- Resene Art Action Student Acrylic Black
- Rub-on metallic wax in gold or Resene Enamacryl Metallic tinted to Resene Gold

### Tips:

Try painting your basecoat colour onto a small piece of card, allow to dry, then apply the rub-on metallics using different techniques until you find your favourite application method.

See the Resene Paint Effects brochure for a range of paint effects samples or visit the Resene website for more Paint Effects ideas - [www.resene.co.nz/homeown/use\\_colr/paint\\_effects.htm](http://www.resene.co.nz/homeown/use_colr/paint_effects.htm) (NZ) or [www.resene.com.au/homeown/use\\_colr/paint\\_effects.htm](http://www.resene.com.au/homeown/use_colr/paint_effects.htm) (AUST).

Resene Paint Effects brochures are available free from Resene ColorShops or order your copy online from [www.resene.co.nz/comn/whtsnew/colrdr/order.htm](http://www.resene.co.nz/comn/whtsnew/colrdr/order.htm) (NZ) or [www.resene.com.au/comn/whtsnew/colrdr/order.htm](http://www.resene.com.au/comn/whtsnew/colrdr/order.htm) (AUST).

### Method:

1. Apply one or two coats of black paint and leave to dry.

2. Using your finger (or a cotton cloth wrapped around your finger) pick up a little gold wax. Be careful not to get too much wax as it is better to apply a little first and then add more if you need it, rather than try and remove any excess.

Rub-on metallics may be applied with a brush, finger or a cloth onto plaster, metal, wood or leather in a variety of techniques depending on the effect you are trying to achieve.

If you prefer a brushed on gold effect, use Resene Enamacryl Metallic tinted to Gold applied lightly by brush in place of the rub-on metallic wax.

3. Rub the wax gently onto the raised areas of the candlesticks. Apply multiple coats if necessary to get the desired effect.
