HOME Nice room! How'd you choose the colours?
AMELIA HOLMES, STYLIST I was inspired by the idea of using accent colours in unexpected and unique ways. We can all get a bit conservative with colour – so creating this room set was a good way of breaking out of that rut and trying something new. I enjoyed pushing past the usual habit of just choosing one or two paint colours, and found these combinations had a summery energy that I really enjoyed.

How have you accessorised the room and complemented the colour palette?
The colours are so bold I didn't think the furniture needed to compete. So I chose strong shapes in white, black or timber that are still legible against this exuberant background. ◗

Who said only your walls could be colourful? Take our lead and bring floors, walls and ceilings to life with Resene The Range fashion colours. Trends for 2014 reference historical hues in brilliant yellows, pumpkin oranges and tomato reds. Paired with pretty pastels for balance, these rich accents give you the most coveted colour trends for 2014. Resene The Range fashion colours come complete with complementary colour suggestions.
