

Create your own colour scheme

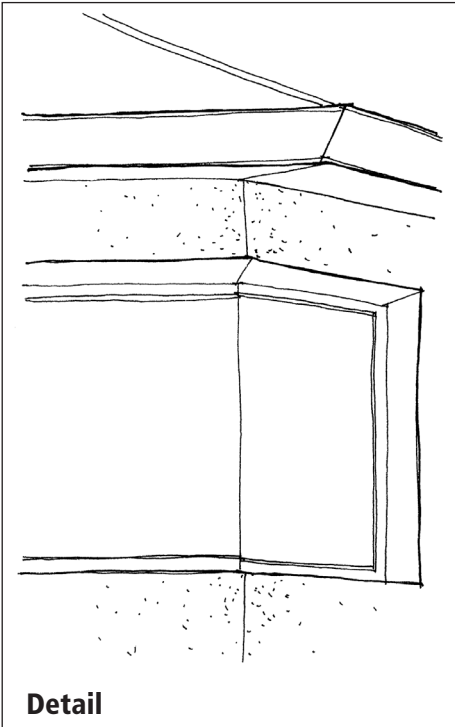

Roof

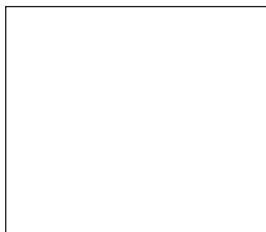

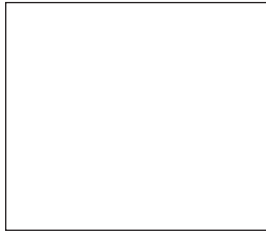

The roof is often highly visible and a key part of the design of the house so it should be included as part of your colour scheme. Choose a colour for durability and to fit with the rest of the colour scheme. Resene Summit Roof (satin) or Resene Hi-Glo (gloss) is ideal. See the Resene Roof systems colour chart for colour ideas. Consider using a Resene CoolColour to minimise heat buildup.

Executive

Detail

Walls

Insist on a Resene Resitex textured finish for your new home. Apply a final coat of Resene Multishield+ to give an easily cleaned surface.

Windows and doors

Powder coated aluminium joinery is recommended for windows to enhance the colour scheme and provide a low maintenance durable surface. If you opt for painted timber doors or windows, use Resene Enamacryl (gloss waterborne enamel), Resene Lustacryl (semi-gloss waterborne enamel) or Resene SpaceCote Low Sheen (waterborne enamel).

Trim

Bargeboards, gutters and soffits are generally best painted in a contrasting colour.

Build your scheme by adding swatches of your favourite Resene colours to the boxes. Or try out Resene EzyPaint virtual painting software and see your favourite Resene colours virtually painted onto your own project. Resene EzyPaint is available free from the Resene website or may be borrowed or purchased from Resene ColorShops and resellers.
