LIMED OAK

Resene Woodsman penetrating oil stain exterior

Resene Woodsman is a newly researched concept in fully penetrating oil based stains. It combines exceptional protection with easy application in a new range of colours.

WHERE TO USE

Woodsman is an ideal product for all exterior timber surfaces, new or weathered, rough sawn or dressed, including:

- weatherboards
- board and batten cladding
- plywood and profiled sheets
- garden furniture
- fences and beams where enhancing the timber's natural appearance is desired.

COLOUR RANGE

The new Woodsman colour range includes colours specially formulated for use on cedar as well as introducing an entirely new colour concept in exterior timber stains. Pickled and limed colours provide an exciting alternative to the traditional colour ranges available. Formulated from a modified base, pickled and limed colour formulations provide the latest in international colour trends and exterior semi-transparent timber finishes.

The colour range consists of the 22 colours shown here with colour matches to the remainder of the Resene Timberstain range also available.

Resene Test Pots in Woodsman colours help you plan your whole house colour scheme, so you know you'll like it before you stain it.

RESENE WOODCARE RANGE

The Resene Woodcare range offers the trade professional and home handyman a product suited to almost every interior and exterior timber application.
