

It's easy to create this vibrant reverse painting on glass with a little bit of help from Resene.

★★★ Difficulty level ★ easy ★★ moderate ★★★ challenging

Resene art with Mark Rayner – 106

You will need:

- Clean cloth
- Resene testpots of Resene Anakiwa, Resene Blue Lagoon, Resene Bowie, Resene Bunting, Resene Captain Cook, Resene Half Resolution Blue, Resene Havelock Blue, Resene Pursuit and Resene Salsa
- Silicon sealer
- White picture frame with glass, backing board and spacers

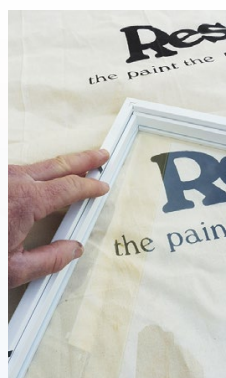

Step 1
Remove the backing board from the picture frame.

Step 2
Wipe the glass with a clean cloth.

Step 3
Remove the spacers from the picture frame and apply a bead of silicon around the edge of the glass.

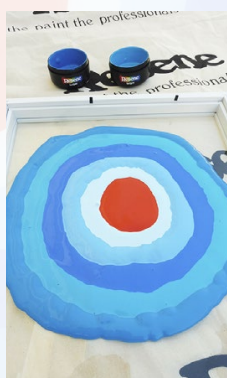

Step 4
Carefully replace the spacers and allow the silicon to dry.

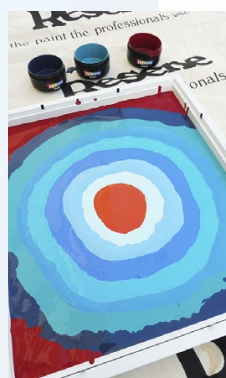

Step 5
With the picture frame face down, carefully drip a circle of Resene Pursuit in the centre of the glass and then drip a ring of Resene Anakiwa around this.

Step 6
Follow this with rings of Resene Havelock Blue and Resene Half Resolution Blue, as shown.

Step 7
Then drip rings of Resene Bowie and Resene Captain Cook.

Step 8
Finally drip rings of Resene Blue Lagoon, Resene Bunting and Resene Salsa. Allow the paint to dry thoroughly and then replace the backing board.

To get the look: Mark painted the background wall with Resene SpaceCote Flat tinted to Resene Romantic.

Other ideas:
For a monochrome effect use a selection of Resene whites, greys and black.
