Resene kids art with Mark Rayner – 34

### You will need:

- Cardboard box
- Gluestick
- Large colour photo (we used a picture cut out from an old calendar)
- Masking tape
- Paintbrushes
- Resene testpots in the following colours: Resene Havoc, Resene Nero and Resene Resolution Blue
- Resene Quick Dry Waterborne Primer Undercoat
- Scissors

**Step one**  
Neaten up the box by placing masking tape along all the joins as shown. Use the scissors to cut the tape to size.

**Step two**  
Paint the box with one coat of Resene Quick Dry Waterborne Primer Undercoat, allowing at least an hour to dry.

**Step three**  
Use the gluestick to glue the colour photo to the centre of the box, as shown. Leave to dry.

**Step four**  
Paint around the photo and all other sides of the box with two coats of Resene Nero, allowing two hours for each coat to dry.

**Step five**  
Paint dials along the front of the TV with Resene Havoc and allow to dry.

**Step six**  
Paint a screen frame around the colour photo with Resene Resolution Blue. Once it's dry, start watching your very own TV.

Transform an old cardboard box into your very own TV using a few Resene Testpots.

### Top tip:

You can also find large colour photographs in most newspapers.

### Here's another idea:

Use another flat box to make a keyboard and hey presto - your very own cardboard box computer! How cool is that?
