

THIS MONTH'S PROJECT

in association with **Resene**
the paint the professionals use

Time for a bathroom or laundry refresh? Make a splash with fresh new colours

A bathroom is an achievable New Year project and choosing the colour is the key. Could you be brave with a painted feature wall perhaps, add a striking back-painted glass splashback or cover one wall with a Resene wallpaper? If you'd prefer a neutral paint hue, add colour with a painted chair, decorative mirror frame, a pot plant, painted shelving or coloured towels.

Which colour to choose? Tranquil, clean-looking blues and greens are always winners in bathrooms. Rich reds and deep blues are a dramatic alternative, but require care as they can make a compact bathroom appear smaller. Avoid using too many colours – you could create a dado by painting the bottom third of your wall in your chosen colour and the rest white.

When you're planning your laundry, practicality is everything. Remember that a high sheen finish will be easier to wipe down than a lower sheen finish but will look more glary. Think about storage and how you are going to sort clothes. Using Resene Blackboard Paint on cupboard doors can be useful for writing reminders or noting what's stored inside.
