The Range Whites & Neutrals brings together a collection of classic, contemporary and luxurious whites and neutrals combined with strength variations of the most popular hues offering a broad range of whites and neutrals for the discerning specifiers and decorators.

Whites and neutrals are ideal on their own or to anchor a scheme, providing a useful backdrop for brighter, more intense feature colours. Those who prefer a minimalist atmosphere will find the **Range Whites & Neutrals** a haven of delightfully muted colour choices offering endless combinations. No matter whether traditional or exterior, contemporary or traditional, Range Whites & Neutrals are a perfect canvas for your scheme.

The **Range Whites & Neutrals** is presented in a fandeck making it easy to find the perfect shade for your colours you need for your scheme.

Colours are available in your favourite Resene products including Resene Sandtex and Resene AquaShield - check with your local Resene ColorShop or Resene Total Home Solutions retailer for assistance with product selection.

Once you have made your colour choices, we recommend you test your colour selection using Resene testpots, A4 drawdowns or individual self-adhesive samples.

Remember, if the fandeck colour is not quite right try intermixing colours or take your colour concept to your nearest Resene ColorShop. Our staff will help you personalise your colour choice to ensure you achieve the exact colour you desire.
