Ways with wood,  
with Mark Rayner – 13

Exterior

### You will need:

- Damp cloth or sponge
- Dry, lint-free cloth
- Exterior PVA glue
- Heavy garden twine
- Paintbrush

- Selection of small seashells
- Small flat piece of driftwood
- Testpot of Resene Waterborne Woodsman waterborne penetrating oil stain in Resene Mosaic
- Two brass cup hooks

**Step one**  
Wash the driftwood, removing any sand and debris with a damp cloth or sponge. Allow to dry thoroughly.

**Step two**  
Apply one generous coat of Resene Waterborne Woodsman to all surfaces of the driftwood.

**Step three**  
Before the Resene Waterborne Woodman has thoroughly dried, wipe off the excess with a dry, lint-free cloth. Leave for 24 hours to dry.

**Step four**  
Carefully screw in two cup hooks along the upper edge of the piece of wood.

**Step five**  
Write the first letter of the house name with PVA glue and attach small shells, as shown.

**Step six**  
Continue forming the letters with PVA glue and shells, finishing each letter in turn.

**Step seven**  
Continue until you have completed the house name.

**Step eight**  
Add a few extra shells for decoration around the edges of the driftwood plaque. Leave to dry thoroughly before hanging from the cup hooks using strong garden twine.

Transform a piece of driftwood into a quirky house plaque with a few shells and a testpot of Resene Woodsman.

### To get the look:

Mark painted the fence the plaque hangs from with Resene Lumbersider tinted to Resene Rob Roy.

### Other ideas:

Create a contrasting house plaque by staining the wood with Resene Waterborne Woodsman tinted to Resene Pitch Black and use small white pebbles to form the letters.
