

Spruce up your shed

Melissa Marriott brings order and style to garden storage, using Resene paints, old crates and hardware store basics.

 Photography by Reuben Looi

What you need

PEGBOARD

- A large pegboard
- Sellotape Everyday Masking Tape
- Resene SpaceCote Low Sheen waterborne enamel in your chosen Resene colours (we used Resene Valentine, Resene Moondance, Resene Kombucha and Resene Good To Go)
- Resene Dacron roller sleeve, with roller handle and roller tray
- Resene dropsheet
- Assorted pegboard hooks

CRATES

- Old beer crates
- Resene SpaceCote Low Sheen waterborne enamel in your chosen Resene colours
- Resene sandpaper, 120 grit
- Resene MacGyver paintbrush

PLANT POTS

- Terracotta pots
- Resene FX Blackboard Paint testpot
- Resene testpot brush
- Chalk

Method

PEGBOARD

- 1 Using masking tape, section off the pegboard to suit the needs of your shed. (A)
- 2 Using Resene SpaceCote Low Sheen waterborne enamel in your chosen Resene colours, paint each section a different colour using the roller. (B)
- 3 Once dry, peel off the masking tape. (C)
- 4 Arrange the pegboard hooks to suit your gardening equipment.

STORAGE

- 1 To upcycle old crates into storage boxes, first sand them. (D)
- 2 Create a cohesive look by painting the crates in the same colours as the pegboard. (E)

PLANT POTS

- 1 Apply masking tape under the lip of the terracotta pots.
- 2 Use a testpot brush to apply Resene FX Blackboard Paint around the tops of the pots. (F)
- 3 Once dry, use chalk to label your plants – an ideal way to grow and display kitchen herbs. (G)
