

# 3979S

## RETARDER

### Description

Slower solvent mixture.  
Composition based on special blend of hydrocarbon solvents.

### Products

3979S            Retarder

### Properties

- Solvent mixture developed to keep 1K/2K product film longer open to give better overspray melt-in and better flow, certainly at higher temperatures.

### Recommended use

- Product preparation in accordance to the recommendations in the TDS of the selected quality.
- Use 5 to 10 % 3979S in a ready-to-spray paint by replacing the regular thinner with 3979S or by addition of 3979S.

### Equipment cleaning

Use 3608S.

Products	Packages (li)	Storability at 20°C (year)	VOC (g/li)
3979S	1 - 5	2	938

### Remarks

- Material has to be at room temperature (18-20°C) before use.

### Safety

Consult Material Safety Data Sheet prior to use. Observe the precautionary notices displayed on the container.
