BLACK STALLION REJUVENATED

Shane Pearson of STL Linehaul Ltd is justifiably proud of his T950 Kenworth. After chasing this particular Kenworth (it is the T950 prototype) for many years, Shane was able to procure it from Tauranga based Bruce Porter in 2003.

The truck underwent a complete transformation, initially drawing our attention as winner of the RAPC (now RALI) Transformation's competition in June 2004. The truck was covered in Resene Automotive product by Exclusive Collision Repairs in Christchurch and the signwriting was added by JBFX.

Since then Shane has been constantly updating the look, with Andrew Geddes from Timaru Signs and Graphix refreshing and adding to the signwriting. A recent addition has been the placing of an airbrushed Stallion Mural on the back wall of the cab. Plenty of chrome and other aftermarket goodies have enhanced the appeal of this outstanding truck.

(We are sure that there is no truth in the rumour that she stays in the shed when it rains...)
