Competitive pricing

- ✓ Robust tendering process.
- ✓ Clear concise quotations.
- ✓ Quality guarantees.

Ask your Resene ColorShop for your local certified **Resene Eco.Decorators** or view them online at ecodecorator.co.nz

Sustainable decorating is more than just choosing an Environmental Choice approved paint. It is also making sure that it is applied in an environmentally responsible manner following sustainable principles.

The **Resene Eco.Decorator programme** has been designed to recognise a nationwide network of environmentally responsible, quality focused painting contractors. Painting contractors can choose to undergo assessment for the Resene Eco.Decorator programme, which includes assessments of principles in practice, sustainable work practices, waste management, project plans and project sign off processes.

Only contractors who successfully meet these standards can promote themselves as an authentic **Resene Eco.Decorator**.

By choosing the services of a **Resene Eco.Decorator** to complete your decorating projects, you will have the confidence that the contractor is committed to sustainable principles in their work processes.

When you hire a certified Resene Eco.Decorator, you will enjoy:

- ✓ A professional quality painting service.
- ✓ Sustainable paint systems and wherever possible use of waterborne paints and **Environmental Choice** approved products on your project to minimise smell, harm to the environment and enable water washup.
- ✓ Waste products will be managed in a recognised environmentally responsible manner using the Resene PaintWise programme and other appropriate systems.
- ✓ The Resene Eco.Decorator's commitment to continually monitor and upgrade their responsibilities and work closely with Resene and the **Resene Eco.Decorator programme**.

Being green is part of our DNA

Sustainability and being green is something we've grown up with at Resene. In the 1950s we introduced waterborne paint to the local market. We were the first New Zealand paint company to offer an extensive range of **Environmental Choice** approved paints in 1996.

We've also worked hard on solvent reduction. The average per litre VOC (volatile solvent) levels of Resene decorative paint sales have dropped by over 90% since 1980.

In 2007 **Resene Zylone Sheen Zero** was introduced offering all the benefits of popular Resene Zylone Sheen without adding unwanted VOCs. And with **Resene decorative tints with no added VOCs**, we can tint thousands of colours without adding any VOCs to the paint.

And to complete the sustainability cycle, we run a world first innovative paint recovery and recycling programme called **Resene PaintWise**.

Since the very early days of our company's development we've had the 'green gene.' It's simply part of our heritage of providing quality sustainable solutions for our customers and the environment.
