Safety Data Sheet

SECTION 1. IDENTIFICATION OF THE MATERIAL AND SUPPLIER

Product Name          Qristal Polysatin  
Other Names          PAINT. Product Code: 257 
Recommended Use       Solvent based varnish.  
Company Name          Resene Paints (Australia) Limited. 
Address              7 Production Avenue 
                      Molendinar, Queensland 4214. 
Emergency Tel          Available Monday – Friday, 8:00 a.m. – 5:00 p.m.  
Free Call             1800 738 383 
Phone                 07 3287 0222 
Fax                   07 3287 0226 

SECTION 2. HAZARDS IDENTIFICATION

Hazard Statement      HAZARDOUS SUBSTANCE. DANGEROUS GOODS. 
                      According to the criteria of the Safe Work Australia and the ADG code. 
GHS Classification    Flammable Liquid Category 3 
                      Skin Corrosion/Irritation Category 2 
Label Elements

Hazard Statements     Flammable liquid and vapour. 
                      Causes skin irritation. 
Precautionary statements 
                      Keep away from heat/sparks/open flames/hot surfaces. – No smoking. 
                      Keep container tightly closed. 
                      Ground/Bond container and receiving equipment. 
                      Use explosion-proof electrical/ventilating/lighting equipment. 
                      Use only non-sparking tools. 
                      Take precautionary measures against static discharge. 
                      Wear protective gloves/eye protection/face protection and other personal protection as 
                      required. 
                      Wash thoroughly after handling. 

SECTION 3. COMPOSITION/INFORMATION ON INGREDIENTS

SECTION 4. FIRST AID MEASURES

Swallowed
Immediately call a POISON CENTRE or doctor. Do NOT induce vomiting.

Eyes
Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do so. If eye irritation persists, get medical advice or attention.

Skin (or hair)
Remove all contaminated clothing and wash before re-use. Wash skin with plenty of soap and water/shower. If skin irritation occurs get medical advice or attention.

Inhaled
Remove victim to fresh air and keep at rest in a comfortable position for breathing. See medical advice if you feel unwell.

First Aid Facilities
Safety shower and eye wash facilities.

Aggravated medical conditions caused by exposure.
The normal routes of exposure are usually by skin contact with the material and/or inhalation of the vapour.
Contact with skin or eyes may cause irritation. Prolonged or repeated skin contact with the liquid may cause Irritant Contact Dermatitis.
Inhalation of vapour or mists may cause irritation to the respiratory tract. May be harmful in contact with skin or inhaled.
As with any chemical product, contact with unprotected bare skin; inhalation of vapour, mist or dust in the workplace atmosphere, should be avoided. Ingestion in any form can be avoided by observing correct occupational hygiene.

Advice to Doctor
Treat symptomatically.

SECTION 5. FIRE FIGHTING MEASURES

Extinguisher
For small fires - Alcohol stable foam or carbon dioxide.
For large fires - Water spray or fog, or dry chemical powder.
Do not use water in a jet.

Hazards from combustion products
On combustion, this product may emit toxic fumes of carbon monoxide and carbon dioxide. May emit clouds of acrid smoke.
Vapours are heavier than air and can spread along the ground to distant ignition sources causing flashback.

Special protective precautions and equipment for fire fighters
Wear full protective clothing and self contained breathing apparatus.
Prevent, by any means available, spillage from entering drains or water course.
DO NOT approach containers suspected of being hot. They may be violently or explosively reactive. Cool fire exposed containers with water spray from a protected location. If safe to do so, remove containers from path of fire.

Hazchem code
3[Y]

SECTION 6. ACCIDENTAL RELEASE MEASURES

Emergency procedures
Avoid contact with spilled or released material. Avoid breathing vapour and avoid contact with skin and eyes. Control personal contact by using protective equipment. Clean up spills immediately.

Environmental precautions
Prevent, by any means available, spillage from entering drains or water course or soil. May pose a long term hazard to the aquatic environment.

Methods and materials for Minor spills
**SECTION 7. HANDLING AND STORAGE**

**Precautions for safe handling**

- Use and store in a well ventilated area.
- Avoid smoking, naked lights, heat or ignition sources.
- When handling, DO NOT eat drink or smoke.
- Vapour may ignite on pumping or pouring due to static electricity.
- DO NOT use plastic buckets.
- Use spark free tools when handling.
- Always wash hands with soap and water.
- Observe proper occupational work practices.

**Conditions for safe storage, including any incompatibilities**

- Store in a metal can or drum in an approved flammable liquids storage area.
- Check all containers are clearly labelled and free from leaks.
- Keep containers securely sealed.
- Store in a cool dry, well-ventilated area, away from sources of ignition.
- Avoid storage with strong oxidising agents.

**SECTION 8. EXPOSURE CONTROLS/PERSONAL PROTECTION**

**National exposure standards for mixture**

No exposure standard has been established for this product. The petroleum solvent products listed in the ingredients have not been assigned National Exposure Standards. However, as a guide for controlling exposure, the exposure standards for the petroleum solvent mixtures listed below should be adopted. Exposed individuals are not reasonably expected to be warned, by smell, that the exposure standard is being exceeded.

<table>

</tbody>
</table>

**Biological Limit Values**

No biological limit allocated

**Engineering Controls**

Use in a well ventilated area.

General exhaust is adequate under normal operating conditions. Local exhaust ventilation may be required in special circumstances. If risk of overexposure exists, wear an approved respirator in compliance with AS1716.

**Personal Protective Equipment**

**Eyes**

- Safety glasses with side shields; or as required, Chemical goggles.
- Contact lenses pose a special hazard; soft lenses may absorb irritants and all lenses concentrate them.

**Hands/Feet**

- Wear chemical resistant gloves.
- Wear safety footwear.

**Protective Clothing**

Skin protection not ordinarily required beyond standard issue work clothes.

**Respiratory Protection**

If work practices do not maintain airborne levels below exposure standards, use appropriate respiratory protection equipment as specified in AS1716. Selection of the Class and Type
of respirator will depend on the level of confinement of the contamination.

SECTION 10. STABILITY AND REACTIVITY

Chemical stability: Product is considered stable.

Conditions to avoid: Ignition sources
Presence of incompatible materials.

Incompatible materials: Flammable liquids should not be stored with:
- Class 1 – Explosives
- Class 2 – Flammable gases
- Class 2.3 – Poisonous gases
- Class 4.2 – Spontaneously combustible substances
- Class 5.1 – Oxidizing agents
- Class 5.2 – Organic peroxides
- Class 7 – Radioactive substances.

Hazardous decomposition products: Oxides of Carbon and Nitrogen.

Hazardous reactions: Hazardous polymerization will not occur.

SECTION 11. TOXICOLOGICAL INFORMATION

Toxicological information for this product is not available. Reference is made, where possible, to the individual constituents.

Acute Health Effects:

Inhaled:
Inhalation of vapours or mists may cause irritation to the respiratory system.

Skin Contact:
Mild irritant. Dermal LD50 (rat) : >2,000 mg/Kg (solvent naphtha).

Swallowed:
Expected to be of low toxicity: LD50>2000mg/kg, Rat (Solvent Naphtha). Aspiration into the lungs when swallowed or vomited may cause chemical pneumonitis which can be fatal. May cause irritation to the mouth, throat, oesophagus, and stomach with nausea, abdominal discomfort, vomiting and diarrhoea.

Eye:
May cause eye irritation, tearing, stinging, blurred vision and redness.
Chronic Health Effects:

Prolonged skin contact with the liquid may cause defatting of the skin. This can result in drying, cracking and irritation of the skin. Long term use may result in Dermatitis.

Inhalation of solvent over an extended period may result in nervous system impairment and liver and blood changes.

SECTION 12. ECOLOGICAL INFORMATION

No data available for this product. Refer to data for ingredients below:

Expected to be hazardous to aquatic organisms. Avoid release to the environment.

Solvent naphtha

Fish : Toxic 1<LC/EC/IC₅₀ <= 10 mg/L
Aquatic Invertebrates : Toxic 1<LC/EC/IC₅₀ <= 10 mg/L
Algae : Toxic 1<LC/EC/IC₅₀ > 10 mg/L

Mobility - Floats on water. Absorbs to soil and has low mobility.
Persistence/degradability – Expected to be readily biodegradable. Oxidizes by photo-chemical reactions in air.
Bioaccumulation – Has the potential to bioaccumulate.

SECTION 13. DISPOSAL CONSIDERATIONS

Disposal methods and containers Consult State Land Waste Management Authority for disposal.
Special precautions for landfill or incineration Incinerate residue at an approved site.
Recycle containers if possible, or dispose of in an approved landfill.

SECTION 14. TRANSPORT INFORMATION

UN Number 1263
UN Proper shipping name PAINT.
DG Class 3 Flammable Liquid
Subsidiary risk None
Packing Group III
Marine Pollutant No
Hazchem Code 3[Y]

SECTION 15. REGULATORY INFORMATION

Poison Schedule 5

FIRST AID:
A For advice, contact a Poisons Information Centre, Australia 13 1126; New Zealand 0800 764 766, or a doctor at once.
G3 If swallowed, do NOT induce vomiting.

SAFETY DIRECTIONS:
1, 4 & 8 Avoid contact with eyes, skin and avoid breathing dust, vapour or spray mist.

The principle components of this material are listed on the Australian Inventory of Chemical Substances (AICS).

NZ HSNO CCID: 3.1C 6.3A 6.4A 6.8A 6.9B 9.1C
NZ EPA Approval: HSR002662 Surface Coatings & Colorants (Flammable)
SECTION 16. OTHER INFORMATION

Date of Preparation: 7th November 2012

Supersedes: 4th May 2010

SDS’s for individual raw materials.

National Exposure Standards for Atmospheric Contaminants in the Occupational Environment. [NOHSC: 1 03(1995)]

Standard for the Uniform Scheduling of Medicines and Poisons. No. 2

Abbreviations:

NOHSC National Occupational Health and Safety Commission
ADG Australian Code for the Transport of Dangerous Goods by Road & Rail
LD₅₀ Median lethal dose
LC₅₀ Median lethal concentration.
TWA Time weighted average. The average airborne concentration of a particular substance when calculated over a normal 8 hour working day, for a five-day working week.
STEL Short term exposure limit. A 15 minute TWA exposure which should not be exceeded at any time during a working day even if the average is within the TWA exposure standard. Exposures at the STEL should not be longer than 15 minutes and should not be repeated more than 4 times per day. There should be at least 60 minutes between successive exposures at the STEL.
