SECTION 2. HAZARDS IDENTIFICATION

| Hazard Statement                          | HAZARDOUS SUBSTANCE. DANGEROUS GOODS. According to the criteria of the Safe Work Australia and the ADG code. |
| GHS Classification                       | Flammable Liquid Category 3            |
|                                          | Toxic to Reproduction Category 1B     |
|                                          | Specific Target Organ Toxicity – Single exposure Category 3 |

| Label Elements                              | DANGER                             |
| Hazard Statements                           | Flammable liquid and vapour.       |
|                                            | May damage fertility or the unborn child. |
|                                            | May cause respiratory irritation.   |
| Precautionary statements                    | Keep away from heat/sparks/open flames/hot surfaces. – No smoking. |
|                                            | Keep container tightly closed.     |
|                                            | Use explosion-proof electrical/ventilating/lighting equipment. |
|                                            | Use only non-sparking tools.       |
|                                            | Take precautionary measures against static discharge. |
|                                            | Wear protective gloves/eye protection/face protection and other personal protection as required. |
|                                            | Wash thoroughly after handling.    |
|                                            | Avoid breathing fumes/gas/mist/vapours/spray. |
|                                            | Use only outdoors or in a well-ventilated area. |

SECTION 3. COMPOSITION/INFORMATION ON INGREDIENTS

</table>
SECTION 4. FIRST AID MEASURES

Swallowed
Immediately call a POISON CENTRE or doctor. Do NOT induce vomiting.

Eyes
Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do so. If eye irritation persists, get medical advice or attention.

Skin (or hair)
Remove all contaminated clothing and wash before re-use. Wash skin with plenty of soap and water/shower. If skin irritation occurs get medical advice or attention.

Inhaled
Remove victim to fresh air and keep at rest in a comfortable position for breathing. See medical advice if you feel unwell.

First Aid Facilities
Safety shower and eye wash facilities.

Aggravated medical conditions caused by exposure. The normal routes of exposure are usually by skin contact with the material and/or inhalation of the vapour. Contact with skin or eyes may cause irritation. Prolonged or repeated skin contact with the liquid may cause Irritant Contact dermatitis. Inhalation of vapour or mists may cause irritation to the respiratory tract. May be harmful in contact with skin or inhaled. May cause lung damage if swallowed. As with any chemical product, contact with unprotected bare skin; inhalation of vapour, mist or dust in the workplace atmosphere, should be avoided. Ingestion in any form can be avoided by observing correct occupational hygiene.

Advice to Doctor
Treat symptomatically.

SECTION 5. FIRE FIGHTING MEASURES

Extinguisher
For small fires - Alcohol stable foam or carbon dioxide. For large fires - Water spray or fog, or dry chemical powder. Do not use water in a jet.

Hazards from combustion products
On combustion, this product may emit toxic fumes of carbon monoxide and carbon dioxide. May emit clouds of acrid smoke.

Special protective precautions and equipment for fire fighters
Wear breathing apparatus plus protective gloves. Prevent, by any means available, spillage from entering drains or water course. DO NOT approach containers suspected of being hot. May be violently or explosively reactive. Cool fire exposed containers with water spray from a protected location. If safe to do so, remove containers from path of fire. Vapours are heavier than air and can spread along the ground to distant ignition sources causing flashback.

Hazchem code
3[Y]

SECTION 6. ACCIDENTAL RELEASE MEASURES

Emergency procedures
Avoid contact with spilled or released material. Avoid breathing vapour and avoid contact with skin and eyes. Control personal contact by using protective equipment. Clean up spills immediately.

Environmental precautions
Prevent, by any means available, spillage from entering drains or water course or soil. May pose a hazard to the aquatic environment.

Methods and materials for containment and clean up.
Minor spills
Contain and absorb small quantities with vermiculate or other non-flammable
absorbent material.

Major spills
Clear area of personnel and move upwind.
Alert fire brigade and tell them location and nature of hazard.
Prevent, by any means available, spillage from entering drains or water course.
Stop leak if safe to do so.
Contain spill with sand, earth or vermiculite.

SECTION 7. HANDLING AND STORAGE

Precautions for safe handling
Use in a well ventilated area.
Avoid smoking, naked lights, heat or ignition sources.
When handling, DO NOT eat drink or smoke.
Vapour may ignite on pumping or pouring due to static electricity.
DO NOT use plastic buckets.
Use spark free tools when handling.
Always wash hands with soap and water.
Observe proper occupational work practices.

Conditions for safe storage including any incompatibilities
Store in a metal can or drum in an approved flammable liquids storage area.
Check all containers are clearly labelled and free from leaks.
Keep containers securely sealed.
Store in a cool dry, well-ventilated area, away from sources of ignition.
Avoid storage with oxidisers.

SECTION 8. EXPOSURE CONTROLS/PERSONAL PROTECTION

National exposure standards for mixture
No exposure standard has been established for this product.
Exposed individuals are not reasonably expected to be warned, by smell, that the exposure standard is being exceeded.
If the breathing zone concentration of ANY of the components is exceeded then the individual is deemed to be over exposed.

</tbody>
</table>

Biological Limit Values
No biological limit allocated.

Engineering Controls
Use in a well ventilated area.
General exhaust is adequate under normal operating conditions. Local exhaust ventilation may be required in special circumstances. If risk of overexposure exists, wear an approved respirator in compliance with AS1716.

Personal Protection

Eyes: Safety glasses with side shields; or as required, Chemical goggles.
Contact lenses pose a special hazard; soft lenses may absorb irritants and all lenses concentrate them.

Hands/Feet: Wear chemical protective gloves.
Wear safety footwear.

Protective Clothing: Skin protection not ordinarily required beyond standard issue work clothes.

Respirator: If work practices do not maintain airborne levels below exposure standards, use appropriate respiratory protection equipment as specified in AS1716. Selection of the Class and Type of respirator will depend on the level of confinement of the contamination.
SECTION 9. PHYSICAL AND CHEMICAL PROPERTIES

Appearance: Clear, colourless liquid.
Odour: Sweet, ester odour.
P pH: Not applicable
Vapour pressure: 3.8 @ 20°C
Vapour density: 4.6
Boiling point: 146°C
Flash Point: 50°C
Solubility: Insoluble in water.
Density: 0.97 Kg/L
UEL: 10.6
LEL: 1.2

SECTION 10. STABILITY AND REACTIVITY

Chemical stability: Product is considered stable.

Conditions to avoid: Ignition sources
Presence of incompatible materials.

Incompatible materials: Flammable liquids should not be stored with:-
Class 1 – Explosives
Class 2 – Flammable gases
Class 2.3 – Poisonous gases
Class 4.2 – Spontaneously combustible substances
Class 5.1 – Oxidising agents
Class 5.2 – Organic peroxides
Class 7 – Radioactive substances.

Hazardous decomposition products: Carbon monoxide may be evolved if incomplete combustion occurs.

Hazardous reactions: Hazardous polymerisation will not occur.

SECTION 11. TOXICOLOGICAL INFORMATION

Toxicological information for this product is not available. Reference is made, where possible, to the individual constituents.

Acute Health Effects:

Oral LD₅₀ (rat): 8532mg/Kg.
Dermal LD₅₀ (rabbit): >5,000 mg/Kg
Inhalation LC₅₀ (rat): 4345 ppm/6 Hrs.

Swallowed: Expected to be of low toxicity. Aspiration into the lungs when swallowed or vomited may cause lung damage. May cause irritation to the mouth, throat, oesophagus, and stomach with nausea, abdominal discomfort, vomiting and diarrhoea.

Eye: Irritating to eyes causing tearing, stinging, blurred vision and redness.

Skin: May cause skin irritation. Prolonged contact may cause defatting of the skin which can lead to dermatitis.

Inhaled: Inhalation of vapours may cause irritation to the respiratory system. Inhalation of high concentrations may cause central nervous system depression resulting in headaches, dizziness, drowsiness and nausea.
**Chronic Health Effects:**
Repeat exposure to high doses can affect the nervous system, or may cause liver or kidney damage. Prolonged contact may cause defatting of the skin which can lead to dermatitis. Animal tests have shown that the beta isomer may cause toxicity to human reproduction or development.

### SECTION 12. ECOLOGICAL INFORMATION

Do not empty into drains or waterways.

Acute aquatic toxicity testing indicates low toxicity. Effect concentrations are > 151mg/L.

**Mobility:** HIGH.
**Persistence/degradability:** LOW. Biodegradable. Oxidises rapidly by photo-chemical reactions in air.
**Bioaccumulation:** Not expected to bioaccumulate.

### SECTION 13. DISPOSAL CONSIDERATIONS

**Disposal methods and containers**
Consult State Land Waste Management Authority for disposal.

**Special precautions for landfill or incineration**
- Incinerate residue at an approved site.
- Recycle containers if possible, or dispose of in an approved landfill.
- Packaging may still contain fumes and vapours that are flammable and harmful. Ensure that empty packaging is allowed to dry.

### SECTION 14. TRANSPORT INFORMATION

**UN Number**
1263

**UN Proper shipping name**
Paint related material

**Class**
3 Flammable Liquid

**Subsidiary risk**
None

**Marine Pollutant**
No

**Packing Group**
III

**Special precautions for user**
The use of a quantity of material in an unventilated or confined space may result in increased exposure and an irritating atmosphere developing. Before commencing consider the use of mechanical ventilation to control exposure.

**Hazchem Code**
3[Y]

### SECTION 15. REGULATORY INFORMATION

**Poison Schedule:** Not scheduled

**FIRST AID:**
For advice, contact a Poisons Information Centre, Australia 13 1126; New Zealand 0800 764 766, or a doctor at once.

The principle components of this material are listed on the Australian Inventory of Chemical Substances (AICS).

### SECTION 16. OTHER INFORMATION

**Date of Preparation:** 22 January 2013

**Replaces:** 18th May 2010

**Literature references.**

SDS’s for individual raw materials.
