Safety Data Sheet

SECTION 1. IDENTIFICATION OF THE MATERIAL AND SUPPLIER

Product Name: **Thinner No. 8**
Recommended Use: Uracryl 400 series thinner (brush or roller application).

Company Name: Resene Paints (Australia) Ltd. T/A Altex Coatings.
Address: 7 Production Avenue
Molendinar, Queensland 4214.

Emergency Tel: Available Monday – Friday, 8:00 a.m. – 5:00 p.m.
Free Call: 1800 738 383
Phone: 07 55126600
Fax: 07 55126697

SECTION 2. HAZARDS IDENTIFICATION

Hazard Statement: HAZARDOUS SUBSTANCE. DANGEROUS GOODS.
According to the criteria of the Safe Work Australia and the ADG code.

Hazardous Substance according to NZ CCID HSNO criteria:
3.1C 6.1D 6.1E 6.3B 6.4A 6.8A 6.9B 9.1C

GHS Classification:
Flammable Liquid
Reproductive Toxicity
Aspiration Hazard

Label Elements:

DANGER

Hazard Statements:
Flammable liquid and vapour.
May damage fertility or the unborn child.
May be fatal if swallowed and enters airways.

Precautionary statements:
Keep away from heat/sparks/open flames/hot surfaces. – No smoking.
Keep container tightly closed.
Ground/Bond container and receiving equipment.
Use explosion-proof electrical/ventilating/lighting equipment.
Use only non-sparking tools.
Take precautionary measures against static discharge.
Wear protective gloves/eye protection/face protection and other personal protection as required.
Wash thoroughly after handling.
Avoid breathing fumes/gas/mist/vapours/spray.
SECTION 3. COMPOSITION/INFORMATION ON INGREDIENTS

<table>

SECTION 4. FIRST AID MEASURES

Swallowed: Immediately call a POISON CENTRE or doctor. Do NOT induce vomiting.

Eyes: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do so. If eye irritation persists, get medical advice or attention.

Skin (or hair): Remove all contaminated clothing and wash before re-use. Wash skin with plenty of soap and water/shower. If skin irritation occurs get medical advice or attention.

Inhaled: Remove victim to fresh air and keep at rest in a comfortable position for breathing. See medical advice if you feel unwell.

First Aid Facilities: Safety shower and eye wash facilities.

Aggravated medical conditions caused by exposure: The normal routes of exposure are usually by skin contact with the material and/or inhalation of the vapour.

- Contact with skin or eyes may cause irritation. Prolonged or repeated skin contact with the liquid may cause Irritant Contact Dermatitis.
- Inhalation of vapour or mists may cause irritation to the respiratory tract. May be harmful in contact with skin or inhaled.
- As with any chemical product, contact with unprotected bare skin; inhalation of vapour, mist or dust in the workplace atmosphere, should be avoided. Ingestion in any form can be avoided by observing correct occupational hygiene.

Advice to Doctor: Treat symptomatically.

SECTION 5. FIRE FIGHTING MEASURES

Extinguisher: For small fires - Alcohol stable foam or carbon dioxide.
For large fires - Water spray or fog, or dry chemical powder.
Do not use water in a jet.

Hazards from combustion products: On combustion, this product may emit toxic fumes of carbon monoxide and carbon dioxide. May emit clouds of acrid smoke.

Special protective precautions and equipment for fire fighters: Wear breathing apparatus plus protective gloves.
Prevent, by any means available, spillage from entering drains or water course.
DO NOT approach containers suspected of being hot.
May be violently or explosively reactive.
Cool fire exposed containers with water spray from a protected location.
If safe to do so, remove containers from path of fire.
Vapours are heavier than air and can spread along the ground to distant ignition sources causing flashback.

Hazchem code: 3[Y]

SECTION 6. ACCIDENTAL RELEASE MEASURES

Emergency procedures: Avoid contact with spilled or released material. Avoid breathing vapour and avoid
contact with skin and eyes. Control personal contact by using protective equipment. 
Clean up spills immediately.

Environmental precautions
Prevent, by any means available, spillage from entering drains or water course or soil.
May pose a long term hazard to the aquatic environment.

Methods and materials for containment and clean up.
Minor spills
Contain and absorb small quantities with vermiculate or other non-flammable absorbent material.

Major spills
Clear area of personnel and move upwind.
Alert fire brigade and tell them location and nature of hazard.
Prevent, by any means available, spillage from entering drains or water course.
Stop leak if safe to do so.
Contain spill with sand, earth or vermiculite.

SECTION 7. HANDLING AND STORAGE

Precautions for safe handling
Use in a well ventilated area.
Avoid smoking, naked lights, heat or ignition sources.
When handling, DO NOT eat drink or smoke.
Vapour may ignite on pumping or pouring due to static electricity.
DO NOT use plastic buckets.
Use spark free tools when handling
Always wash hands with soap and water.
Observe proper occupational work practices.

Conditions for safe storage including any incompatibilities
Store in a metal can or drum in an approved flammable liquids storage area.
Check all containers are clearly labelled and free from leaks.
Keep containers securely sealed
Store in a cool dry, well-ventilated area, away from sources of ignition.
Avoid storage with oxidisers.

SECTION 8. EXPOSURE CONTROLS/PERSONAL PROTECTION

National exposure standards for mixture
No exposure standard has been established for this product.
Exposed individuals are not reasonably expected to be warned, by smell, that the exposure standard is being exceeded.
If the breathing zone concentration of ANY of the components is exceeded then the individual is deemed to be over exposed.

Component | TWA ppm | mg/m³ | STEL ppm | mg/m³ |
--- | --- | --- | --- | --- |
Petroleum solvent | - | 790 | - | - |
PGMA | 50 | 274 | 100 | 548 |

Biological Limit Values
No biological limit allocated

Engineering Controls
Use in a well ventilated area.
General exhaust is adequate under normal operating conditions. Local exhaust ventilation may be required in special circumstances. If risk of overexposure exists, wear an approved respirator in compliance with AS1716.

Personal Protection
Eyes.
Safety glasses with side shields; or as required, Chemical goggles.
Contact lenses pose a special hazard; soft lenses may absorb irritants and all lenses concentrate them.

Hands/Feet
Wear chemical protective gloves.
Wear safety footwear.
**Protective Clothing**  Skin protection not ordinarily required beyond standard issue work clothes.

**Respirator**  If work practices do not maintain airborne levels below exposure standards, use appropriate respiratory protection equipment as specified in AS1716. Selection of the Class and Type of respirator will depend on the level of confinement of the contamination.

### SECTION 10. STABILITY AND REACTIVITY

**Chemical stability**  Product is considered stable.

**Conditions to avoid**  Ignition sources
- Presence of incompatible materials.

**Incompatible materials**  Flammable liquids should not be stored with:
- Class 1 – Explosives
- Class 2 – Flammable gases
- Class 2.3 – Poisonous gases
- Class 4.2 – Spontaneously combustible substances
- Class 5.1 – Oxidising agents
- Class 5.2 – Organic peroxides
- Class 7 – Radioactive substances.

**Hazardous decomposition products**  Carbon monoxide may be evolved if incomplete combustion occurs.

**Hazardous reactions**  Hazardous polymerisation will not occur.

### SECTION 11. TOXICOLOGICAL INFORMATION

Toxicological information for this product is not available. Reference is made, where possible, to the individual constituents.

**Acute Health Effects:**

**Swallowed:**  Expected to be of low toxicity LD_{50} >2000mg/kg rat (petroleum solvent). Aspiration into the lungs when swallowed or vomited may cause chemical pneumonitis which can be fatal. May cause irritation to the mouth, throat, oesophagus, and stomach with nausea, abdominal discomfort, vomiting and diarrhoea.
Eye: Irritating to eyes causing tearing, stinging, blurred vision and redness.

Skin: Irritating to skin. Prolonged contact may cause defatting of the skin which can lead to dermatitis.

Inhaled: Inhalation of vapours may cause irritation to the respiratory system. Inhalation of high concentrations may cause central nervous system depression resulting in headaches, dizziness, drowsiness and nausea. Continued inhalation may result in unconsciousness, coma and even death.

**Chronic Health Effects:**

Repeat exposure to high doses can affect the nervous system, or may cause liver or kidney damage. Prolonged contact may cause defatting of the skin which can lead to dermatitis. This product contains trace amounts of propylene glycol monomethyl ether acetate [PGMA] beta isomer. Animal tests have shown that the beta isomer of PGMA could potentially cause toxicity to human reproduction or development.

---

**SECTION 12. ECOLOGICAL INFORMATION**

No data available for this product. However, in reference to data for ingredients below, this product is expected to be of moderate toxicity to aquatic life. May pose a chronic hazard to aquatic life.

Do not empty into drains.

**Solvent naphtha or xylene**

Fish: Toxic $1<\text{LC/EC/IC}_{50} \leq 10 \text{ mg/L}$

Aquatic Invertebrates: Toxic $1<\text{LC/EC/IC}_{50} \leq 10 \text{ mg/L}$

Algae: Toxic $1 <\text{LC/EC/IC}_{50} > 10 \text{ mg/L}$

**Mobility:** Product is mobile and may contaminate groundwater. It is unlikely to be absorbed to sediments or soils.

**Persistence/degradability:** Biodegradable oxidises rapidly by photo-chemical reactions in air.

**Bioaccumulation:** Has the potential to bioaccumulate in the aquatic environment.

---

**SECTION 13. DISPOSAL CONSIDERATIONS**

Disposal methods and containers: Consult State Land Waste Management Authority for disposal.

Special precautions for landfill or incineration:

- Incinerate residue at an approved site.
- Recycle containers if possible, or dispose of in an approved landfill.
- Packaging may still contain fumes and vapours that are flammable and harmful. Ensure that empty packaging is allowed to dry.

---

**SECTION 14. TRANSPORT INFORMATION**

UN Number: 1263

UN Proper shipping name: Paint related material

Class: 3 Flammable Liquid

Subsidiary risk: None

Marine Pollutant: No

Packing Group: III

Hazchem Code: 3[Y]

---

**SECTION 15. REGULATORY INFORMATION**

Poison Schedule: 5

FIRST AID:

A For advice, contact a Poisons Information Centre, Australia 13 1126; New Zealand 0800 764 766, or a doctor at once.

Printed: 09/09/15
Resene Paints (Australia Ltd T/A Altex Coatings.

Issue no. 02
Prepared: 06/06/2013
SAFETY DIRECTIONS:
1, 4 & 8 Avoid contact with eyes, skin and avoid breathing dust, vapour or spray mist.

The principle components of this material are listed on the Australian Inventory of Chemical Substances (AICS).

NZ Group Standard: HSR002662 Surface Coatings & Colourants (Flammable)
