Resene Ceiling Paint
waterborne flat

Resene Ceiling Paint is recommended for use on ceilings of living rooms, bedrooms and dining rooms where a flat finish is required. A very low odour, low spatter product.

interior

Typical uses
- Fibrous plaster
- Paperfaced plasterboard
- Plaster glass
- Repaints

Vehicle type: 100% acrylic
Pigmentation: Titanium dioxide
Solvent: Water
Finish: Flat
Colour: White and colours off white
Dry time (minimum): 45 minutes at 18°C
Recoat time (minimum): 2 hours
Sealer required: Yes
Theoretical coverage: 10 sq. metres per litre
Dry film thickness: 34 microns at 10 sq. metres per litre
Usual no. of coats: 1-2 coats
Durability: Good
Thinning and clean up: Water; in hot dry conditions can be thinned with up to 5% Resene Hot Weather Additive
VOC: c. 1 gram per litre (see Resene VOC Summary)

Performance and limitations

1. Inhibits mould growth.
2. Flow and build properties mean that one coat is often enough to achieve complete hiding.
3. Excellent application properties with low spatter.
4. An Environmental Choice approved product.

Limitations
1. Do not apply at temperatures below 10°C or when it is liable to drop below 10°C during the drying period.
2. Not recommended for use in bathrooms, kitchens or laundries (use Resene SpaceCote Flat – see Data Sheet D314).
3. Will not penetrate chalking and powdery surfaces.

Please ensure the current Data Sheet and Safety Data Sheet are consulted prior to specification or application of Resene products. View Data Sheets online at www.resene.com/datasheets. If in doubt contact Resene.

Surface preparation
Ensure surface is dry and free from dirt, dust and loose material. Oil, grease and mould must be removed prior to painting. Fly spots and nicotine stains must be removed using Resene Emulsifiable Solvent Cleaner (see Data Sheet D804) or sugar soap.

Sand old glossy surfaces to provide a key for subsequent paint coats.

New work, paperfaced plasterboard
Ensure new paperfaced plasterboard is prepared to a level of finish suitable for the specified paint finish. Resene Broadwall Surface Prep & Seal (see Data Sheet D807) or Resene Broadwall 3 in 1 (see Data Sheet D810) will be required to achieve a level 5 finish. Seal Resene Broadwall Surface Prep & Seal (see Data Sheet D807) with Resene Broadwall Waterborne Wallboard Sealer (see Data Sheet D403) or Resene Sureseal (see Data Sheet D42).

Seal bare substrates as required.

Sanding dust from old lead or chromate based paints or old building materials containing asbestos may be injurious to the health if inhaled or ingested. Seek expert advice if the presence of these materials is suspected.

Application
Stir thoroughly before use. Apply by brush, speed brush, synthetic fibre roller or spray. Apply one to two coats of Resene Ceiling Paint allowing at least two hours between coats.

Precautions
Ensure correct sealer is used.
