D305 **Dec 2015**

Resene **Ceiling Paint**

waterborne flat

Resene Ceilina Paint recommended for use on ceilings of living rooms, bedrooms and dining rooms where a flat finish is required. A very low odour, low spatter product.

interior

Typical uses

- Fibrous plaster
- Paperfaced plasterboard
- Plaster glass
- Repaints

Physical properties 100% acrylic Titanium dioxide

Vehicle type Pigmentation Solvent Water Finish Flat Dry time (minimum) 45 minutes at 18°C Recoat time (minimum) Sealer required Theoretical coverage Dry film thickness

Colour White and colours off white 2 hours

10 sq. metres per litre

34 microns at 10 sq. metres per litre

1-2 coats Good

Water; in hot dry conditions can be thinned with up to 5% Resene Hot Weather Additive

VOC c. 1 gram per litre (see Resene VOC Summary)

Performance

Usual no. of coats

Thinning and clean up

Durability

Performance and limitations

- Inhibits mould growth.
- Flow and build properties mean that one coat is often enough to achieve complete hiding.
- Excellent application properties with low spatter.
- 4. An Environmental Choice approved product.

Limitations

- Do not apply at temperatures below 10°C or when it is liable to drop below 10°C during the drying period.
- 2. Not recommended for use in bathrooms, kitchens or laundries (use Resene SpaceCote Flat – see Data Sheet D314).
- 3. Will not penetrate chalking and powdery surfaces.

Ceiling Paint waterborne flat

Surface preparation

Ensure surface is dry and free from dirt, dust and loose material. Oil, grease and mould must be removed prior to painting. Fly spots and nicotine stains must be removed using Resene Emulsifiable Solvent Cleaner (see Data Sheet D804) or sugar soap.

Sand old glossy surfaces to provide a key for subsequent paint coats.

New work, paperfaced plasterboard

Ensure new paperfaced plasterboard is prepared to a level of finish suitable for the specified paint finish. Resene Broadwall Surface Prep & Seal (see Data Sheet D807) or Resene Broadwall 3 in 1 (see Data Sheet D810) will be required to achieve a level 5 finish. Seal Resene Broadwall Surface Prep & Seal (see Data Sheet D807) with Resene Broadwall Waterborne Wallboard Sealer (see Data Sheet D403) or Resene Sureseal (see Data Sheet D42).

Seal bare substrates as required.

Sanding dust from old lead or chromate based paints or old building materials containing asbestos may be injurious to the health if inhaled or ingested. Seek expert advice if the presence of these materials is suspected.

Application

Stir thoroughly before use. Apply by brush, speed brush, synthetic fibre roller or spray. Apply one to two coats of Resene Ceiling Paint allowing at least two hours between coats.

Precautions

Ensure correct sealer is used.
