Resene Furniture and Decking Oil

Resene Furniture and Decking Oil is designed for direct application to timber decks and furniture to enhance and restore the timber colour and provide protection against water, fungi, and U.V. light.

The product is designed for annual application to keep decks and furniture in good condition and assist with water repellency.

exterior

Typical uses
- New and weathered timber
- Timber outdoor furniture

Performance and limitations

Performance
1. Enhances the natural colour of new timber decks.
2. Enhances the look of weathered timber decks.
3. Easy application.

Limitations
1. Will not kill existing mould - use Resene Moss & Mould Killer (see Data Sheet D80).
2. Will not penetrate through existing coatings.
   Such areas will need excess wiping off.
3. Will lose reactivity if container is contaminated with water.
4. Will typically require maintenance annually.
5. Trafficable areas coated with this unmodified product will not comply with the Building Act Clause 1.3.3(d).

Contains no isocyanates or heavy metals
Do not thin, clean up with mineral turps
c. 320 grams per litre (see Resene VOC Summary)

Please ensure the current Data Sheet and Safety Data Sheet are consulted prior to specification or application of product. If in doubt contact Resene.
Furniture and Decking Oil

Surface preparation
Exposed timber (greater than one week)
Remove any gross contamination and semi-detached cellulose fibres. Apply Resene Moss & Mould Killer (see Data Sheet D80).

New timber
Ensure timber is dry and free from dirt, dust and loose material.

Caution
Sanding dusts from some hardwoods are considered carcinogenic and all old timber sanding dusts should be considered potentially harmful. Always wear an efficient dust mask.

Application
Apply by brush, roller or spray. Saturate surface with Resene Furniture and Decking Oil. Badly weathered surfaces may take up to 3 square metres per litre; new timber will require 10-12 square metres per litre.

Always trial Resene Furniture and Decking Oil on a representative piece of timber first to ensure it gives the result you want on the actual timber you are staining.

New timber should be treated with Resene Furniture and Decking Oil before assembly. Pay special attention to the underside of decks, as they will be difficult to coat after the deck has been assembled.

All faces of the timber should be treated with special attention to end grains.

Precautions
1. Will not penetrate through existing coatings or very hard latewood bands. For best results wipe excess Resene Furniture and Decking Oil off with a dry, absorvent, lint free cloth rubbing along the grain.
2. Contains powerful fungicides. Avoid skin contact. If any skin contact occurs, wash skin thoroughly with soap and water. Do not scrub the skin.
3. FLAMMABLE - keep away from heat and open flame. Keep closed when not in use.
4. Avoid breathing vapour - use with adequate ventilation.

Please ensure the current Data Sheet is consulted prior to specification or application of Resene products. If the surface you propose to coat is not referred to by this Data Sheet, please contact Resene for clarification.
