**Vehicle type**
- Penetrating solventborne oil stain

**Pigmentation**
- Natural coloured oxides

**Solvent**
- Hydrocarbon/ester

**Finish**
- Fully penetrating

**Colour**
- Selection of standard colours from the Resene Exterior timber stains colour chart

**Dry time (minimum)**
- 24 hours

**Recoat time (minimum)**
- 24 hours

**Primer required**
- No

**Theoretical coverage**
- Dependent on surface

**Usual no. of coats**
- 2 (new work); 1-2 (old work)

**Thinning and clean up**
- Do not thin; clean up with mineral turps

**Greater than 557 grams per litre**
- Greater than 557 grams per litre

**VOC**
- Greater than 557 grams per litre (see Resene VOC Summary)

**Typical uses**

**Performance**
1. Provides a genuine rustic look.
2. Very easy application.
3. Requires minimum surface preparation.
4. Contains powerful fungicides for mould resistance. Avoid contact with plants.

**Limitations**
1. Will not kill existing mould. Use Resene Moss & Mould Killer (see Data Sheet D80).
2. Will not penetrate through existing coatings. Such areas will need excess wiping off.
3. Will not prevent checking of plywood.
4. Will require maintenance after two summers.
5. Areas coated with this product unmodified may not comply with New Zealand Building Code D1 3.3(d). Refer also to New Zealand Building Code D1 2.0 table 2.
Woodsman Wood Oil Stain

Surface preparation

Existing stains
Remove all the weakly adhering coating by sanding. Treat with Resene Moss & Mould Killer (see Data Sheet D80).

Exposed timber (greater than one week)
Remove any gross contamination and semi-detached cellulose fibres. Treat with Resene Moss & Mould Killer (see Data Sheet D80).

New timber
Ensure surface is dry and free from dirt, dust and loose material.

Caution
Sanding dusts from some hardwoods are considered carcinogenic and all old timber sanding dusts should be considered potentially harmful. Always wear an efficient dust mask.

Sanding dust from old lead or chromate based paints or old building materials containing asbestos may be injurious to the health if inhaled or ingested. Seek expert advice if the presence of these materials is suspected.

Application
Apply by brush, speedbrush or roller. Saturate surface with Resene Woodsman wood oil stain. During application stir the contents of the container frequently to ensure even distribution of colour. Aim to achieve the targeted coverage for the substrate as outlined below.

Typical coverage

Badly weathered timber
First coat 3-4 square metres per litre.
Second coat 5-7 square metres per litre.

Dressed timber
First coat 10-12 square metres per litre.
Second coat 12-14 square metres per litre.
Apply a third coat 12-14 square metres per litre after about three to six months.

Rough sawn timber
First coat 4-6 square metres per litre.
Second coat 9-11 square metres per litre.

Precautions
1. Will not penetrate through existing coatings or very hard latewood bands. For best results wipe excess Resene Woodsman wood oil stain off with a dry, absorbent, lint-free cloth rubbing along the grain.
2. Contains powerful fungicides. Avoid skin contact. If any skin contact occurs, wash skin thoroughly with soap and water immediately. Do not scrub the skin.
3. FLAMMABLE - Keep away from heat and open flame. Keep closed when not in use.
4. Avoid breathing vapour - use with adequate ventilation.
