Resene Grassmarking Paint
waterborne exterior

Resene Grassmarking Paint is a waterborne paint suitable for marking out lines and field areas on grass without harming the grass itself. Depending on the concentration required, Resene Grassmarking Paint may be thinned by 2-3 parts water making it a cost-effective option for all field marking projects.

Usual no. of coats

1

Thinning and clean up

Water

5 grams per litre (see Resene VOC Summary)

Performance and limitations

Performance

1. Quick and easy to apply.
2. Designed especially for application to grass without the normal fungicides and biocides in standard decorative paint.
3. An Environmental Choice approved product.

 Limitations

1. Do not apply at temperatures below 10°C or when it is liable to drop below 10°C during the drying period.
2. Not designed for use on any other surfaces other than grass. For line marking on concrete or black seal tennis courts use Resene Lumbersider (see Data Sheet D34).

Please ensure the current Data Sheet and Safety Data Sheet are consulted prior to specification or application of product. If in doubt contact Resene.
Grassmarking Paint

Surface preparation
Trim grass to an even length. Ensure grass is dry prior to application.

Application
Apply by brush (No.1 roller sleeve), roller or spray.

To remove the Resene Grassmarking Paint wait for the grass to grow and cut the lawn. This will cut off the painted area.

Precautions
1. Ensure Resene Grassmarking Paint is applied evenly and avoid thick applications. It is important that the grass still receives sunlight through the coating to ensure it will continue to grow.
