It's time to paws for thought and hear the call of the wild with a little animal print. Going a step further than the prints seen on the fashion catwalk, these wallpaper designs are roaring with style with big cats ready to pounce, colourful birds perched in tropical palms and schools of fish exploring the depths. In the same way pets add colour to our lives making us laugh at their curious antics, animal prints give a room a sense of fun. These wildlife designs remind us of the amazing wonders of planet Earth. There are playful primates, beautiful birds and favourite four legged friends – there's a whole world to explore.

top tip

Many animals have evolved to blend into their natural habitat so it's not surprising that animal prints work well with timber furniture stained with Resene Colorwood wood stain, natural materials such as rattan and earth toned paint colours.
