

LOEWE S25

HOT TIP
The key is to harmonise these lively tones with subtle elements to avoid overwhelming the senses. For example, to subdue intense greens or yellows, introduce **Resene Chill Out** or **Resene Lemon Twist**.

GUCCI S25

Vanilla Ice
Mellow yellows are having their time in the sun. Extend these to your interiors by way of creamy **Resene Popcorn**, **Resene Egg Sour**, or **Resene Melting Moment**. Use these colours confidently on larger surfaces, such as cabinetry or a statement ceiling, to create a daring yet sophisticated backdrop. The result? A home that feels as exhilarating and refreshing as a burst of fruity, icy sweetness.

Double Dip
Look to the daring colour combinations of Rochas' S25 and Loewe's S25 runways and bring them to life in interior spaces. Consider **Resene Ballerina** or **Resene Sunshade** as the lime twist in a well-loved granita — refreshing yet balanced when paired with neutral tones or textured materials. Layering different shades within a single colour family creates depth. Introduce these hues in unexpected places, such as statement lighting or boldly painted furniture, allowing your space to echo the deliciously cool charm of a Sicilian gelato cart.

ROCHAS S25

PALATE CLEANSE

Evokes the playful vibrancy of a perfectly curated sorbet selection by balancing bold hues with a refined touch. Lift inspiration from Gucci's S25 collection by layering your interiors with *Resene Citrus* or *Resene Candy Floss* to energise any space. Start with key accents — upholstery, ornamental objects, or even a feature wall — to infuse a tangy freshness reminiscent of the frozen dessert aisle.
