

DEEP IN THE FOREST

With the right palette, the colour of harmony, balance and peace can turn your house into a relaxing paradise.

Take inspiration from nature and layer up greens in a tone-on-tone colour scheme.

Take inspiration from nature and layer up greens in a tone-on-tone colour scheme. Start with the darkest greens generally near floor level and gradually add ever-lighter greens, much as you would find the greens lightening as they reach the canopy in a forest. Dark stained timbers, such as a floor finished in Resene Colorwood Pitch Black or Resene Colorwood Mid Greywash, will ground any green palette just as a forest floor does.

As the centre of the colour spectrum, green brings harmony, balance and peace. It soothes and relaxes. While green can be seen as a cool colour, it can be easily warmed with black undertones for a softer and smokier green, or blue undertones to make it more of a sea-foam tone.

The Resene colour collection includes the latest designer paint hues to dress your home.
