Paint effects allow you the freedom to capture a mood, create ambience and transform the mundane into something special. Certain techniques like Colourwashing are incredibly practical at disguising less than perfect surfaces, like old floors.

Colourwashing is a two step process where a basecoat colour is washed over with a stronger colour. This is then reduced with RESENE FX Paint Effects Medium, to achieve an effect made up of different tones and textures.

Colour Palette

Paint colours clockwise from bottom left in RESENE Half Karaka, RESENE Cobblestone, RESENE Prairie Sands, RESENE Calico and RESENE Brown Sugar with background in RESENE Anglaise.

Adding texture

All pots painted in RESENE Sandtex mediterranean effect. RESENE Sandtex is a tough acrylic texture finish for beautifying and protecting concrete structures. Recreate the texture of natural sandstone. Ideal as an excellent basecoat for RESENE FX Paint Effects Medium as the texture adds an extra dimension to the effect.
