

COLOUR TRENDS WITH RESENE

Terracotta with a rose-tinted twist

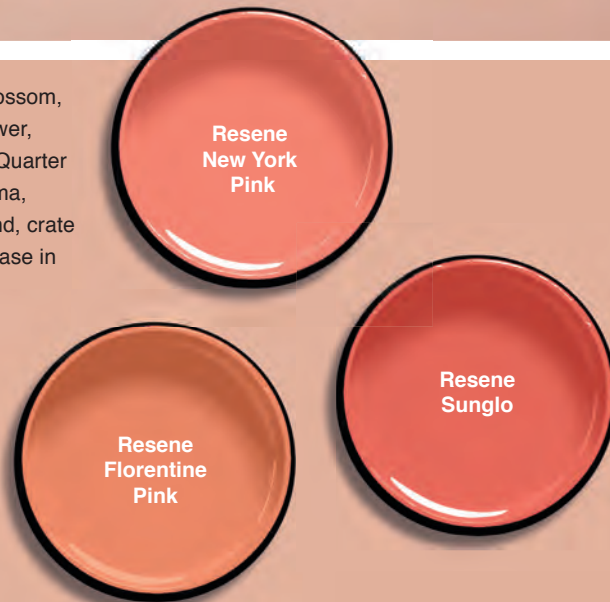

THE RISE OF EARTHY ROSE

A modern take on an old favourite: terracotta. This tone-on-tone living space harks back to the retro appeal of the early 2000s when terracotta was big... but sees it through rose-tinted glasses. This look uses rosier versions of terracotta, in rich saturated tones, and brings them together for a style that's at once eye-catching and luxe, but also soothing and organic. The plushness of a velvet chair is balanced by the natural foraged finds, the colour and texture of the stool and the earthiness of the little jug and bowl.

Other colours to try with earthy rose – rich warm whites, sharp pale yellows and charcoal-blues. Use rustic greens to balance and cool the heat of earthy pinks.
