Create a scheme that's earthy and calm

Seeking inspiration from around the globe for our homes is a well-trodden and successful route to take. The earthy colours and serenity of Japanese design principles translate beautifully to New Zealand, both in our interiors and outdoor spaces. Underpinned with dusky Resene browns and greys, these schemes are enlivened with accents of fiery red and golden ochre, and enriched with textural elements such as timber, decking and furniture, finished in Resene Woodsman stains. Almost volcanic in nature and perfect for a moody autumnal look, balance is achieved with the interplay between opposites – light and dark, vibrant and subdued. Plants work to soften the hard lines of the built environment and enhance the organic feel of the space, creating a connection with nature and a haven of tranquillity.
