

1 *Up top...*

Once everyone painted their ceilings white. These days many opt for neutrals and the new trend is to use colour on your ceiling. Continue your wall colour over the ceiling or be brave and pick a bold feature to attract attention.

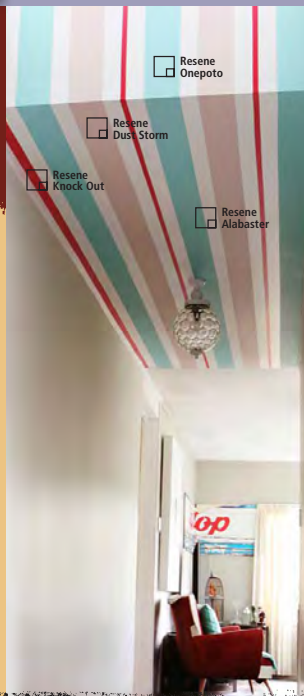

3 *It's all about you...*

You live in your home so surround yourself in the colours and things you love. Embrace the things that make you different. This floor was created using images cut out of magazines then clear coated in Resene Aquaclear.

4 *Multi colour*

Why have just one colour, when you can have more? With painted stripes you can choose the colours, the position and the stripe pattern giving you the eyecatching look of a wallpaper that is unique to your tastes. Or try colour blocking or stencilling for a shot of added colour.

5 *New life*

Give old furniture a new look with a fresh paint colour. Cane and wooden furniture is ideal for a paint treatment. A great option for those renting to get a fresh new look without needing to paint the walls.

2 *Shhh it's a secret...*

So much of our lives are now on show and we often choose paint colours based on what others will think. Indulge your wildest colour fantasy using secret colour – paint it inside your cupboard, wardrobe or chest of drawers. It's something for you to enjoy that you don't have to share with others.
