

Breakthrough

Resene Broadwall

Ranchsliders, massive windows, super smooth finishes and monolithic walls can be a nightmare causing critical light conditions and less than perfect finishes on walls as the glancing light shines a spotlight on any surface imperfections. The situation is made worse when the level of finish is insufficient, such as a level 4 finish when a level 5 finish is needed.

Resene Broadwall 3 in 1 can resolve this nightmare for you ...

- Spray applied high build suitable for use on timber, gypsum board stoppings, fibrous plaster and polymer based stopping compounds.
- Single step coating that outperforms the traditional system of conventional skim coating, joint compound and primer coat.
 1. A sealer (when thinned),
 2. A surfacer
 3. A finish coat on ceilings tinted to a range of popular Resene colours.
- In ceiling applications where a flat white finish is desired, it may be left unpainted providing an ideal final finish.
- Minimises callbacks caused by joint banding and photographing.
- Ensures smoother finished walls and ceilings than by simply using a plasterboard primer.
- Requires minimal sanding substantially reducing dust and enabling faster project completion.
- Installed cost savings versus traditional separate applications of a skim coat and a primer coat.

Apply

Results are achieved with airless spray using a unit capable of achieving a flow rate of no less than 3 litres per minute, such as a Graco Ultra 795 Mark II. A 527 tip is recommended for application to small areas and a 1227 tip is recommended for application to larger areas (tip sizes are minimum required for application). Use a 60 mesh gun and in line filters with a 3/8 hose from the spray unit. Power leads for unit operation must not exceed 20 metres.

Roller option

For those who prefer to apply a skim coating by roller or brush, try Resene Broadwall Surface Prep & Seal designed to skim coat the surface and seal ready for topcoating.

Further technical information

See Data Sheet D810 for Resene Broadwall 3 in 1 or Data Sheet D807 for Resene Broadwall Surface Prep & Seal - available from Resene ColorShops or online from the Resene website.

Finishing

Finish in your choice of Resene quality topcoats, such as:

- Resene SpaceCote Low Sheen (see Data Sheet D311)
- Resene Zylone Sheen or Resene Zylone Sheen VOC Free (see Data Sheet D302)
- Resene SpaceCote Flat (see Data Sheet D314)
- Resene Lustacryl (see Data Sheet D310)
- Resene Aquapoxy (see Data Sheet RA42)
