OLD BECOMES NEW

Upcycle memories of the past. Slightly retro in mood, nostalgic, simple and honest, it's about our homes being a haven, epitomised in scrap booking, slow cooking, knitting, holidays at the bach and handcrafts.

**POPS OF COLOUR**

Striking touches of colour bring fun, excitement and energy. As our communities have become more global, thanks in no small part to modern technology, we draw inspiration from all over the world from the comfort of our own home or office. This has broadened our outlook on colour palettes and combinations, banishing those restrictive colour rules to the history books.

**WEATHERED AND WORN**

The world seems to be moving ever faster. Downtime is becoming a luxury. Our reaction is to surround ourselves in weathered and washed hues that feel familiar and lived in. Earthy, neutral tones continue to be part of this trend, showing our growing appreciation for the earth and its resources. Beiges and browns are offset by a soft golden metallic shimmer. Antique and aged oranges meet smoky neutrals, smoky greys and dusty hues, such as Resene Triple Truffle, Resene Triple Rakaia and Resene Half Innocence, which seem to have traversed the passage of time.
