Step one

Sand the entire paintable surface using a light-grade sandpaper, making sure your movements follow the same direction as the wood grain. Once sanding is complete, wipe down all surfaces with a soft, damp, well wrung out cloth. Allow to dry.

Step two

Paint the entire surface with a coat of Resene Waterborne Smooth Surface Sealer. This provides a grip on smooth surfaces, readying them for topcoating with your favourite Resene topcoat.

Resene Waterborne Smooth Surface Sealer is waterborne, has lower VOCs than solvent-borne products and is Environmental Choice approved.

Step three

Using a mini roller for a super-smooth finish, topcoat all surfaces with Resene Enamacyrl waterborne gloss enamel in a shade of your choice. For maximum drama, we chose Resene Blackjack from the Resene Whites & Neutrals collection.
