

Resene colour charts are updated regularly. This colour chart file is part of the colour chart archive, which we provide so you can view Resene colours that have been available over the years. Most older colours can still be tinted – check with your Resene ColorShop team if you need an older colour for your project.

To view the latest Resene colour charts, visit www.resene.com/colour-charts

Resene Non-Skid Deck & Path

Resene Non-Skid Deck & Path (see Data Sheet D313) has been designed to provide a comfortable walking surface for all interior and exterior situations where a non-skid finish is desired.

Available in a desirable low sheen finish, Eco Choice approved Resene Non-Skid Deck & Path may be tinted to complement existing décor, both inside and out. Combinations of contrasting colours may be used to create decorative effects in courtyards and pathed areas, either as part of a new landscaping plan or to rejuvenate weathered surfaces.

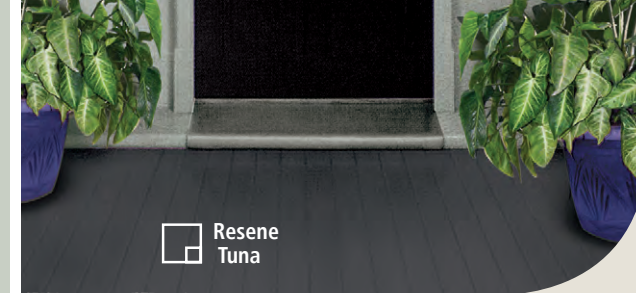

It is recommended that a light colour is applied to the edge of each step to clearly identify the edge of each step reducing the likelihood of accident. Avoid using Resene Pompeii on broad surface areas as it will be more prone to dirt marking.

Quick and easy to apply, trafficable areas may be upgraded and coloured with minimal disruption. Use Resene Paint Prep and Housewash (see Data Sheet D812) to quickly refresh any Resene Non-Skid Deck & Path surface that has become covered in dirt.

Colours marked with cc are also available as a Resene CoolColour. Check with Resene staff whether a Resene CoolColour is right for your project.

These colours are also available tinted into other Resene products if you wish to use them on other areas of your project.

Resene Walk-on

Giving your steps and porch a fresh coat of paint can do wonders for the overall look of your entranceway.

Resene Walk-on (see Data Sheet D322) is an Eco Choice approved satin general purpose flooring and paving paint, based on tough acrylic resins to give maximum durability and abrasion resistance in a single pack finish. Use on steps, decking, concrete, porches, suitably primed timber, composite boards and interior floors.

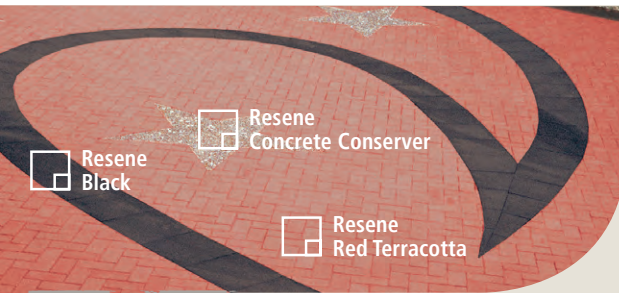

Resene Walk-on colours are also available in Resene Uracryl where a high performance two pack system is preferred. Mix with Resene Anti-Slip Grip Additive for a non-slip finish.

Consider using a Resene CoolColour version of the colour if you are applying a dark colour outside as it will help to reflect more heat than the standard colour.

Choose any Resene colour tinted from white, pastel, light, mid and ultra deep tone from Resene colour charts for your Resene Walk-on painted finish.

For a clear finish on walkable areas, Resene Walk-on is also available in Resene Walk-on Concrete Clear natural look (see Data Sheet D511) and Resene Walk-on Concrete Clear Wet Look (see Data Sheet D512).

For a natural look, add colour to cementitious surfaces with Resene Concrete Stain (see Data Sheet D58).

An interior/exterior solventborne acrylic stain designed to penetrate the surface of concrete and masonry, Resene Concrete Stain forms a tough low sheen finish that protects and enhances the natural texture of the concrete.

Use on concrete driveways, paths, carports, swimming pool surrounds and light industrial floors or anywhere concrete blocks, poured concrete, paving stones and cobblestones are used.

Resene Concrete Conservor, a clear gloss, is also available for protecting quarry tiles, exposed aggregate, slate and concrete from dirt, dust and other contaminants.

Resene Concrete Stain performs best on porous concrete. The desired effect may be more difficult to achieve on smooth concrete.

Resene Sports Court Coating

Create playable spaces inside and out, with Resene Sports Court Coating.

See the Resene Let's Play palette for colour options for Resene Sports Court Coating.

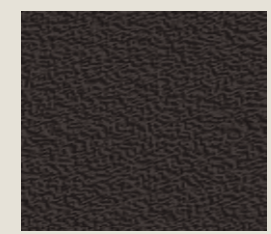

Resene Blacktop

Resene Blacktop (see Data Sheet D304) is a cold-applied, heavy bodied, slip resistant topping for use on asphalt.

Based on a bitumen emulsion with graded fillers, Resene Blacktop dries to produce a durable weather and wear resistant finish.

For best results apply with a Resene hi-solids roller. Use this Eco Choice approved finish on paths, driveways, tennis courts and other recreational areas.

Black

Resene Swimming Pool Paint

After a hard day's work, relaxing in a swimming pool is always popular.

Resene Swimming Pool Paint (see Data Sheet D69) has been specially designed for direct application to concrete swimming pools.

A pool coated in Resene Swimming Pool Paint Magic Blue will be less affected by chemicals used for treating pools than traditional pigmented pool finishes. The result is a longer lasting colour, giving you more time to enjoy your pool because you'll spend less time repainting it.

Magic Blue 10SP10

Resene Squash Court Coating

Resene Squash Court Coating (see Data Sheet RA406) is a two pack waterborne epoxy especially developed for coating squash court walls to give a durable tough coating with excellent resistance to abrasion, unsurpassed adhesion to appropriately prepared surfaces and excellent resistance to chemical solvents and water. The waterborne formulation overcomes the risk of solventborne products in areas of restricted ventilation.

Resene Squash Court Coating is easy to apply by brush, roller or airless spray, and may be applied by either volunteers or professional contractors. Supplied as a six litre unit, two unit packs of mixed material will provide sufficient product to apply one coat to the squash court playing area. Use red adhesive stickers or Resene Uracryl 403 (see Data Sheet RA56) for court markings.

Resene Concrete Stain

Resene Grassmarking Paint

Ground markings are a critical part of all field games. Resene manufactures specially formulated Resene Grassmarking Paint, suitable for marking out lines and field areas on grass without harming the grass itself.

Available in 10 litre pails of white, other colours are available on request (minimum volumes may apply). Depending on the concentration of colour required, Eco Choice approved Resene Grassmarking Paint may be thinned by 2-3 parts water making it a cost-effective option for all field marking projects.

Resene Cemseal

Eco Choice approved Resene Cemseal (see Data Sheet D504) is a clear penetrating concrete sealer and dust coat. It's a non-decorative coating for use on industrial and domestic concrete floors and trafficable areas where a low cost, easily applied and maintained method of controlling concrete dusting is required.

Resene Cemseal facilitates dust control by providing an easy to clean surface.

Products for all projects

Resene has a comprehensive range of products and decorating tools for all areas in and around your home or business, including products that are ideal for all those backyard projects.

Keep your place cooler with a Resene CoolColour™

If you are planning to use dark colours outside consider investing in a Resene CoolColour™. Colours made using Resene CoolColour technology reflect more heat than a standard colour reducing the stress on the coating, substrate and building keeping them cooler. Check with Resene ColorShop or reseller staff to see whether a Resene CoolColour is right for your project.

Colour timber

Resene Lumbersider Low Sheen will add colour to wooden surfaces in next to no time. Wash your fence or deck down using Resene Paint Prep and Housewash (see Data Sheet D812) and rinse off with water. Treat existing mould with Resene Moss & Mould Killer (see Data Sheet D80), ensuring you rinse off the solution with copious amounts of water. Allow to dry, then coat with Resene Lumbersider Low Sheen.

Complement with a stained finish

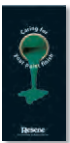

For a more natural look, try Resene Waterborne Woodsman (see Data Sheet D57a), a transparent wood finish that allows you to recolour your timber while still allowing the natural grain to show through. Use on exterior wood surfaces, including fences, gates, weatherboards and planters. See the Resene Exterior woodcare chart to choose from the range of transparent wood stains in limed, traditional and brights.

Colour your planters

Textured, colourwashed, painted or stained, Resene have a wide range of products suitable for decorating planters. Available in a huge range of colours, Resene testpots allow you to add colour to your garden planters without being left with litres of excess paint. For a more earthy finish use Resene AquaShield (see Data Sheet D601), a dead flat mineral effect finish, available in a wide range of natural colours.

Caring for your paint finish

Annual washing will help maintain the fresh appearance of your paintwork. Follow the recommendations in the Resene Caring for your paint finish brochure or on the Resene website to keep your paint finish looking its best.

Trial first

Always trial your selected product on a representative surface to ensure it gives the result you want on the actual surface you are painting or staining before commencing the full project.
