# KAREN WALKER PAINTS

**OUR INSPIRATION FOR THIS CHART CAME FROM THE BAUHAUS SCHOOL OF THE 1920s WHOSE CONCEPT WAS TO CREATE AND COMBINE COLOURS FROM AN EMOTIONAL POINT OF VIEW RATHER THAN A TECHNICAL ONE, TO GROUP COLOURS IN A WAY THAT TELLS A STORY RATHER THAN SIMPLY MATCHING THEM TONALLY.**

**WITH THIS IN MIND WE'VE CREATED SEVEN STORIES THAT, TRUE TO THE KAREN WALKER STYLE, PLAY WITH THE COMBINING OF OPPOSITES AND PUTTING TOGETHER OF IDEAS IN SURPRISING WAYS.**

**WE HOPE THAT NOT ONLY WILL YOU LIKE THE COLOURS BUT THAT THE IDEAS WE PRESENT IN TERMS OF MIXING THEM TOGETHER WILL INSPIRE YOU TO TELL A COLOUR STORY OF YOUR OWN.**

Karen Walker colours are available exclusively in Resene premium paints from Resene ColorShops and selected Resene Resellers.

The Resene product range includes a full selection of interior and exterior paints, so no matter what you paint, you can paint it with Karen Walker.

Always use testpots to confirm your colour choices in the area you are planning to paint. Karen Walker colours are available in convenient 55ml testpots from your local Resene ColorShop and selected Resene Resellers.

**KEY** L = Light P = Pastel U = Ultra deep  
D = Deep M = Mid SA = Silver aluminium W = White

CC = Also available as a Resene CoolColour™. A change in tone or product may be required for some colours to achieve a Resene CoolColour effect.

**NOTE 01** The approximate light reflectance value (LRV) of a colour indicates the amount of visible light that a colour will reflect. Black has a light reflectance value of 0% and absorbs all light. The surfaces are consequently very dark and can get very hot. In contrast, white has a light reflectance value of 100% and keeps a building light and cool. All colours fit within these two extremes. A Resene CoolColour™ is formulated to reflect more of the sun's energy, improving the colour's heat and total solar reflectance (TSR) properties compared to a normal colour, keeping the coating, substrate and building cooler.

**NOTE 02** Mid to dark colours are not suitable for some exterior substrates and if used may cause damage to the substrate, such as warping, checking and premature failure. Always check with the substrate supplier prior to commencing any work to ensure colour selections fit within their guidelines. Resene also manufactures Resene CoolColour technology and this may increase the colour range that can be suitable over some heat sensitive substrates - refer Resene for further information.

**NOTE 03** Tones listed above are subject to change if colours are reformulated.

**NOTE 04** Colours may be available in selected products or sizes only. Check with Resene ColorShop or Reseller staff to ensure your selected colour is available in the product and/or size you require.

**NOTE 05** This colour chart is finished with Resene SpaceCote Low Sheen waterborne enamel, a product ideally suited to kitchens, bathrooms and broadwall areas. Metallic chips finished with Resene Enamacryl Metallic.

© Copyright Resene Paints Ltd. September 2008. Accurate reproduction of the colours shown in this colour range is only available using genuine Resene premium products, tinters and formulations. These are not available from other manufacturers or retailers. Unauthorised use of Resene colours and colour names breaches Resene's copyright and trademark rights. Colours may appear to vary with different gloss levels, lighting, substrate texture and application method and technique. Printed on environmentally responsible paper produced in an ISO14001 (Environmental Management System) accredited mill, from Elemental Chlorine Free (ECF) pulp sourced from sustainable forests and plantations. Printed using vegetable-based inks. Please recycle.
