

The trends have come around to perennial favourites – deep blue, red, the striking tone of black and near black, the soothing restfulness of duck egg blue and greyed blues and the bold pops of orange and yellow to add a touch of upbeat liveliness. So often do we see so many of the perennial favourites wrapped into one trends collection; fashion favours in a fandek.

Remember your childhood... that playful streak, your willingness to embrace the new and the joy and wonder in the smallest of things? Embrace your inner child (it's still in there somewhere!) and be spontaneous, add that bold happy colour you've always loved for a touch of fun. Sure it might not last 10 years but the enjoyment you'll get out of it in even a short period will far outweigh feeling trapped by safe choices. Colours should inspire you, help you feel at home and reflect who you are.

There is a sense of rejuvenation and reintroducing happy memories of the past to the present, bringing the favourites from our childhood into the lives of our own family.

Dusty and smoky, there is a new palette of colours coming through that feel timeless, gently weathered and softened over the passage of time. Easy to live with and coordinate, they're a sophisticated alternative to cleaner pastels. They bring with them a sense of being more grounded and less airy than the pastels of recent years.

Reds are strong and powerful, with influencing blue tones. Grey has hidden depths; sometimes blue, sometimes green. Once the complement, it's now a feature. Browns are turning more yellow toned, making them more complementary with wood.

Neutrals as always are the balance. The backdrop to the brights, your favourite accessories, the respite from busy life and the soft cocoon you can use as a launch pad as you progress down the path to bold choices. Use colour blocking and stenciling to combine favourite colours and really show off a space. Transform your walls into the artwork.

Where once there were rules, guidelines and boundaries, now there is free will, free choice and endless possibilities. The only limit is your imagination. Choose what you want, where you want and change when and if you want to. Pick and choose from the trends, but interpret them to suit you. There is no greater seal of approval for a colour scheme than your own. If you like it, then it's right.

So throw off the shackles and dive in; a world of colour is waiting for you.

Happy decorating!

Using this fandek

The Range fashion fandek is part of the leading edge **The Range collection**, a series of colour tools favoured by colour professionals.

Key features include:

- A fashion collection of classic and contemporary hues, making it easy to achieve a fashion finish on all projects.
- Large colour swatches to provide a better appreciation of the colour value. Swatches are flush to the right edge of each page to facilitate matching with other swatches.
- Innovative 'colour isolators' allowing colour chips to be isolated without the confusion of other colours. The isolators are finished in a neutral shade of grey, an internationally recognised standard that shows the colour at its truest (AS4004-1992).

A 'gloss indicator' to help you visualise a gloss paint surface (the chips are presented in Resene SpaceCote Low Sheen, a low sheen paint finish).

Approximate reflectance value and tone information included in an alphabetically sorted index and on the back of each colour chip for easy reference.

RGB value and colour match pencil information included on the back of each colour chip for easy translation from physical colour swatch to rendered colour.

Colour scheme suggestions printed on the reverse of each colour chip to assist you in your colour selection.

Individually coded colours allowing you to cross-reference them back to the Resene Total Colour System.

Degree of sheen

The Resene Total Colour System provides a huge variety of colours available in different gloss levels to suit all applications.

Gloss paints have a highly reflective smooth surface and are easier to clean than paints with less surface smoothness. They are ideal for areas exposed to heavy traffic or heavy use, especially where fingerprints, grease or grime are common. Colours tinted into high gloss paints appear cleaner and more intense than colours tinted into flat paints. Due to their highly reflective appearance, gloss paints tend to highlight surface imperfections. If the surface to be painted is marred or irregular, it is best to select a paint with less gloss. Gloss greater than 80% gloss: Resene Hi-Glo, Resene Enamacryl, Resene Super Gloss.

Semi-gloss paints have a slightly glossy appearance that is not as highly reflective as that of gloss paints. These types of finishes offer good stain resistance and are easy to clean. Paints with a semi-gloss appearance are excellent for use on many of the same areas as gloss paints. They are ideal for walls and woodwork that is subject to wear and on weatherboards and exterior cementitious surfaces. Semi-gloss 30-45%: Resene Sonyx 10i, Resene Lustacryl, Resene Lusta-Glo.

Satin paints tend to impart more warmth and depth to surfaces than do flat paints. They are more stain resistant than flat paints, but less stain resistant than semi-gloss and gloss paints. Satin finishes are a popular option for roofing. 20-30% gloss: Resene Summit Roof.

Low sheen paints are the most popular finish for interior broadwall areas and an ideal choice where some sheen is desired and good cleaning properties are necessary, such as in living areas, hallways, bedrooms and playrooms. Occasionally, these types of paints are used for ceilings, however, their slight sheen will tend to highlight surface imperfections. Outside low sheen finishes are most commonly used over timber, concrete and plaster

Low sheen paints are the most popular finish for interior broadwall areas and an ideal choice where some sheen is desired and good cleaning properties are necessary, such as in living areas, hallways, bedrooms and playrooms. Occasionally, these types of paints are used for ceilings, however, their slight sheen will tend to highlight surface imperfections. Outside low sheen finishes are most commonly used over timber, concrete and plaster
