

Resene colour charts are updated regularly. This colour chart file is part of the colour chart archive, which we provide so you can view Resene colours that have been available over the years. Most older colours can still be tinted – check with your Resene ColorShop team if you need an older colour for your project.

THE 2002 RANGE

Conceived for the year 2002. A collection of contemporary and classic colours by Resene Paints.

Resene Total Colour System

The Range 2002 features chromatically softer greens, blues and neutrals counterbalanced by deep ultra-saturated yellows, oranges and reds. There is an increase in non hue-specific bridging colours - those that float between hues.

Yellows blur into the realm of orange and include burnt mustards, bright buttery yellows and rich muddy creams. Weighty yellows meet optimistic oranges and edge into rust dominant coppers.

Colours such as Lusty and Tall Poppy shift between red and orange, resulting in intriguing ambiguity. Ultra-saturated Aubergine is becoming a classic, influencing other deep and dark reds. The primary red Monza rounds off the range of reds as the speediest red out.

New lilacs Lola and Grey Suit are warm and complex. Lilacs darken into rich inky violets and warm red-based purples.

Greens are primarily softer with a herbal influence. Yellow greens retain prominence, while the emergence of cleaner greens marks a return towards the primary.

'Barely there' blues join fresh mineral aqua and deepwater marine blues. Zumthor, Scandal and Conch float with Tarawera and Bunting.

Sophisticated browns offer an urban yet natural presence as they punctuate the palette of neutrals.

The darkest Range 2002 colours are never merely black, but are saturated with red, blue or green undertones to play games in varying light conditions. Diesel, Oil, Nero and Jaguar each offer subtly different personalities.

Whites also take on underlying personalities. Palest mint greens meet crisp icy blues, alongside classic beige neutrals and greyed off-whites.

The Range 2002 offers classic and contemporary hues to cater for all tastes. Whether a quest for timeless elegance or a short-term extravagance afforded by the painted surface, interiors can be as changeable as a season or a whim.

COLOUR SELECTION

Creating a colour scheme can be a difficult task. With the help of The Range 2002 and Resene Paints' expertise, you have the means to design and create a colour scheme to suit your personal style, whether it is classical, contemporary or avant-garde.

As a member of The International Colour Guild, Resene has access to leading edge information on colour trends and future colour predictions.

With this support, Resene is able to introduce a collection that will take you (and your clients if you're a colour professional) into the year 2002 and beyond.

The Range 2002 is presented in a fan deck, making it easy to isolate and select the exact colours you need for your decorating project.

Once you have made your colour choices, test your colour selection using Resene Testpots.

Remember, if the fan deck colour is not quite right, try intermixing colours or take your colour concept to your nearest Resene ColorShop. Resene ColorShop staff can personalise your colour choice to ensure you achieve the exact colour you need.

USING THIS FAN DECK

The Range 2002 fan deck is a leading-edge colour tool favoured by colour professionals.

Key features include:

- Larger colour swatches to provide a better appreciation of the colour value.
- An innovative 'colour isolator' allowing colour chips to be isolated without the confusion of other surrounding colours. The isolator, in a neutral shade of grey, is an internationally recognised standard that shows the colour at its truest (AS4004:1992).

- A 'gloss indicator' providing the impression of a gloss paint surface (the chips are presented in a matt finish).
- Classic off-whites located in the back of the fan deck for easy access.
- Colour scheme suggestions printed on the reverse of each colour chip to assist you in your colour selection.
- Individually coded colour chips allowing you to cross-reference back to the Resene Total Colour System.

COLOUR GUIDELINES

Use the most intense hues and values in areas occupied for a short period of time, such as formal dining rooms, hallways, staff lunchrooms, laundries and entrances.

Avoid monotony and treat the eye and mind to at least a moderate variety of colour. Harmonious colour selections are created by a pleasing relationship of the three dimensions of colour: hue, intensity and reflectance value.

A balanced selection of colours in the correct proportions is likely to be the most pleasing to the eye.

A touch of contrasting colour can be lively and exciting but too much can become uncomfortable. On the other hand, too much moderation produces dullness.

Personal taste and preferences are the most important considerations in choosing a colour scheme.

Think of colour as a chameleon

- It changes depending upon accent colours.
- Adjacent colours influence it.
- White or beige colours will take on the tint of adjacent hues.
- Large areas intensify a colour.
- Colour changes according to the lighting.

Colour changes as gloss levels change. This is due to the reflection of light that is scattered at different angles on a flat finish to that of a gloss finish.

This can make it challenging when building a colour scheme, especially trim work or when you want to be creative with gloss levels. An indication of differing gloss levels is illustrated below.

DEGREE OF SHEEN

The Resene colour ranges not only provide a huge variety of colours, but also many of the colours are available in five different gloss levels to suit a variety of applications.

'SEE' THE FINISH Virtual painting with Resene EzyPaint allows you to visualise the entire colour scheme before the redecorating even starts. Resene EzyPaint can be downloaded free from the Resene website www.resene.co.nz or purchased on CD Rom from your local Resene ColorShop.

REFLECTANCE VALUES %

Reflectance Value (RV) of a colour indicates the amount of light and heat that it will reflect. Black has a RV of zero and absorbs all light and heat. White has a RV of nearly 100 and reflects the most light and heat. All colours fit between these two extremes. Therefore, dark painted surfaces can become very hot while light colours keep a building cool and light.

Please be aware that stress and possibly damage can result when painting in dark colours on unstable substrates such as imperfectly dried timber, certain plastics such as PVC and old embrittled paint systems. Our Resene ColorShop staff are there to help and advise you.

GLOSSARY

COMPLEMENTARY

A scheme made up of colours that are opposite to each other on the colour wheel, e.g. red and green.

CONTRAST

The effect of using different colours or tones side by side.

HUE

Hue is pure colour - it can be another name for colour.

PRIMARY COLOUR

Colours that cannot be produced by mixing any two other colours.

REFLECTANCE VALUE

This is the degree of lightness or darkness of a tint, shade, tone. White has the highest reflective value and black the lowest.

SECONDARY COLOURS

Colours formed by mixing together two primary colours. They are: orange, green, and purple.

SHADE

A shade is a pure colour (hue) with black added. This new colour has a lower reflective value (is darker) than the original colour.

TERTIARY COLOURS

Colours formed by mixing together any two secondary colours.

TINT

A tint is a pure colour (hue) with white added. This new colour has a higher reflective value (is lighter) than the original hue.

TONAL SCHEME

Monochromatic. Using several values of one colour.

TOPE

This is pure colour (hue) with grey added. This new colour is a softer variation of the original.

TOTAL COLOUR SYSTEM

A colour system divided into 12 palettes with notational coding to reflect their position in colour space.

TRADITIONAL

Proven colour scheme that has been used successfully over a long period of time.

VARIANTS

Varying shades of the one colour, eg. 1/2 or 1/4 Spanish White.

<p>Chalky A subdued and complex oxide yellow. Chalky works well with white or an off-white such as Pearl Lusta (30:3). Chalky also works well with most greens and blues.</p>	<p>Anzac A rich and warm mustard yellow. Try Anzac with rich reds, violets or blues.</p>	<p>Supernova An in-your-face yellow of surprising intensity! Use Supernova as a contrast to raw materials or use with hues of similar weight.</p>	<p>Vesuvius A bright and strong rust-orange. Try Vesuvius with Kenyan Copper (5:5), Cab Sav (9:2), Tarawera (19:5) or Hillary (24:1).</p>	<p>Thunderbird A racy deep orange with a captivating-red edge. Try Thunderbird with similarly intense hues.</p>	<p>Red Devil An intense dark red with a blue edge. Red Devil looks fabulous with native timbers. Try with Chalky (1:1), Eternity (16:5), Tana (24:5) or Stonewall (23:2).</p>	<p>Matrix A smooth and sultry red-oxide. Try Matrix with Chalky (1:1), Kenyan Copper (5:5), Hillary (24:1) or Lemon Grass (25:2).</p>	<p>Tamarillo A blue based berry red. Tamarillo works well with native timbers such as Rimu and Matai. Try Tamarillo with Pavlova (26:1), Tia Maria (5:2), Diesel (9:1) or Sisal (25:3).</p>	<p>Diesel A mysterious and dark black-red. Use Diesel as the darkest red or as a subtle shift from classic black.</p>	<p>Aubergine The deepest and darkest eggplant-burgundy. Try Aubergine with Tussock (2:5), Turmeric (1:3), Piper (4:2), Grey Suit (13:4) or Domino (22:3).</p>	<p>Revolver A complex and moody blackened purple. Try Revolver with Saffron (2:3), Mobster (13:5), Napa (25:4) or Tea (26:3).</p>	<p>Voodoo A vivacious violet hue. Try Voodoo with Indochine (4:3), Stiletto (6:3), Pohutukawa (10:4) or Skeptic (21:3).</p>	<p>Amethyst Smoke A complex mid range lilac. Try Amethyst Smoke with Pavlova (26:1), Coriander (16:2), Tax Break (19:4), Submarine (21:4) or Hillary (24:1).</p>	<p>Gossip A fresh and clean melon green. Try Gossip with Kournikova (2:2), Siren (7:5), Alabaster (28:5) or Bianca (28:4).</p>	<p>Corduroy A complex greyed green of considerable depth. Try Corduroy in an opulent scheme with deep reds and strong neutrals.</p>	<p>Orinoco A soft calming green that works well in a light scheme. Try Orinoco with Coriander (16:2), Tana (24:5), Loafer (27:4) or Bianca (28:4).</p>	<p>Racing Green A time-honoured match to the deep, clean, British Racing Green. Try Racing Green with Pearl Lusta variants (page 30) or stronger cream neutrals such as Pavlova (26:1) or Tahuna Sands (27:1).</p>	<p>Torea Bay A vibrant historical blue. Try Torea Bay in a crisp scheme with Alabaster (28:5) or with other brights such as Sushi (15:4), Thunderbird (5:1) or Saffron (2:3).</p>	<p>Ziggurat A soft and warm blue with a subtle grey undertone. Try Ziggurat with Turmeric (1:3), Castro (10:3), Finn (11:2), Breaker Bay (14:4) or Loafer (27:4).</p>	<p>Tasman A soft silvery grey with a hint of blue-green. Try Tasman with Alabaster (28:5), Sea Fog (27:5), White Pointer (26:5) or Bianca (28:4).</p>	<p>Kilimanjaro A deep blackened brown. Try Kilimanjaro with Jazz (9:5), Mondo (16:4), Lemon Grass (25:2), Tana (24:5) or Tea (26:3).</p>	<p>Nero The deepest black of the Range, with inky blue undertones. Nero can be used as an alternative to black and will work with almost any colour.</p>	<p>Hillary A green toned beige. Try Hillary with Racing Green (17:1), Eternity (16:5), Castro (10:3), Red Devil (6:1) or similar neutral hues.</p>	<p>Ottoman A frosty off-white with a crisp peppermint edge. Try Ottoman with other soft hues in a restful scheme.</p>	<p>Pavlova A strong neutral cream with a hint of green. Try Pavlova with strong reds such as Jazz (9:5), Aubergine (10:1) and Red Devil (6:1) or combine with off-whites such as Alabaster (28:5) and Bianca (28:4).</p>	<p>Tahuna Sands A rich creamy hue with a non-acidic green undertone. Try Tahuna Sands with Jazz (9:5), Lusty (5:3), Caper (15:3), Oracle (14:5) or Coconut Cream (27:2).</p>	<p>Parchment A light beige neutral. Use Parchment as the main colour in a minimalist scheme or try it with stronger colours such as Tarawera (19:5), Eternity (16:5) or Mondo (16:4).</p>	<p>Quater Spanish White A quarter strength version of Spanish White (29:3). This colour can be used as a ceiling or trim colour in a Spanish White (page 29) scheme or as an alternative when pure white seems too harsh.</p>	<p>Colonial White A yellow based cream with a hint of green. Colonial White is a traditional favourite that has more complexity than Pearl Lusta (30:3).</p>								
<p>Chenin A mellow and buttery citrus yellow. Chenin works well with most blues, greens and neutrals. Try Chenin with Alabaster (28:5), Kenyan Copper (5:5) or Tax Break (19:4).</p>	<p>Kournikova A bright and sunny yellow. Try Kournikova with pure white or a contrasting blue.</p>	<p>Orange Roughy A deep and fiery orange. Try Orange Roughy with Lusty (5:3), Castro (10:3) or Cowboy (22:5).</p>	<p>Piper A captivating complex hue: the ideal urban orange.
