Resene colour charts are updated regularly. This colour chart file is part of the colour chart archive, which we provide so you can view Resene colours that have been available over the years. Most older colours can still be tinted – check with your Resene ColorShop team if you need an older colour for your project.

To view the latest Resene colour charts, visit www.resene.com/colour-charts

Picture to palette

Not sure which colour to choose? Turn your favourite photo into a Resene colour palette using the free online Resene Palette Generator. Or scan in a favourite flower, shell or painting and use that as inspiration for your next colour palette. Try it out for yourself at resene.com/palettegenerator.

Explore a colour library

View a huge range of Resene colour swatches in the in-store colour library at your local Resene ColorShop or reseller. Browse through thousands of large A4 swatches finished in real Resene paint. You're bound to find one that suits. You can also view swatches online in our colour library, resene.com/colour.

'See' the finish

Virtually paint your project from tip to toe with our free online Resene EzyPaint virtual painting tool and visualise your entire colour scheme before your decorating even starts. Try it out for yourself at resene.com/ezypaint.

Put your colour to the test

No matter how you select your colours, always use Resene testpots to confirm your choices in the area you are planning to paint. Choose from a wide range of testpots at your local Resene ColorShop or reseller or order from the Resene ColorShop online, shop.resene.com/testpots.

Choose the right product

We have all the paints, coatings, wood stains and specialist coatings you need for your decorating projects, inside and out. View the Resene Recommended paint systems brochure and ask Resene staff for help choosing the right paint system for your project. Find out more at resene.com/recommendedpaints.

Keep your project cooler

If you're using dark colours outside, consider investing in a Resene CoolColour. Colours made using Resene CoolColour technology reflect more of the sun's heat than a standard colour minimising the stress on the coating and the substrate and reducing unwanted heat buildup. Check with Resene ColorShop or reseller staff to see whether a Resene CoolColour is right for your project. Find out more at resene.com/coolcolour.

Good looks for longer

Look after your paint to help it last. Annual washing will help keep maintain the fresh appearance of your paintwork. Follow the recommendations in the Resene Caring for your paint finish brochure or on the Resene website, resene.com/paintcare, to keep your paint finish looking its very best.

Eco Choice Aotearoa

Choose to help the environment

Minimise the effect your decorating projects have on the environment by choosing one of the Resene range of Eco Choice approved products. Our commitment to sustainability led to Resene being named Sustainable Business of the Year at the 2010 National Sustainable Business Awards.

Enjoy the Resene Promise of Quality Guarantee

Enjoy the Resene Promise of Quality Guarantee on a wide range of Resene premium paints. See your Resene ColorShop, reseller or the Resene website, resene.com/promiseofquality, for a copy.

Be PaintWise

For tips on minimising the impact of your decorating on the environment see resene.com/paintwise.

Need help?

We can help you with everything from which colours and paints to choose to the right prep and accessories. Visit your local Resene ColorShop or reseller or use our free services online - Ask a Resene Colour Expert, resene.com/colourexpert and Ask a Resene Paint Expert, resene.com/paintexpert.

Remember you only get authentic Resene colours when you use Resene tinters in Resene paint bases. Resene decorative tinters with no added VOCs and the true Resene colour formulations are unique and only available from Resene. So make sure you insist on genuine Resene products and tinters for your project.

Key: **CB** = Cool black **D** = Deep **M** = Mid **MI** = Mid grey
O = Ochre **U** = Ultra deep **W** = White

cc = Also available as a Resene CoolColour™. A change in tone or product may be required for some colours to achieve a Resene CoolColour effect. CoolColour and standard variants of a specific colour use different pigment combinations by necessity to achieve a match to the same Resene master colour standard. This can cause slight colour differences depending on the degree and type of light, which naturally varies with the time of day.

Colours with ( ) around them are alternative names for this colour.

Note 1: The approximate light reflectance value (LRV) of a colour indicates the amount of visible light that a colour will reflect. Black has a light reflectance value of 0% and absorbs all light. The surfaces are consequently very dark and can get very hot. In contrast, white has a light reflectance value of 100% and keeps a building light and cool. All colours fit within these two extremes. A Resene CoolColour™ is formulated to reflect more of the sun's energy, improving the colour's heat and total solar reflectance (TSR) properties compared to a normal colour, keeping the coating, substrate and building cooler.

Note 2: Mid to dark colours are not suitable for some exterior substrates and if used may cause damage to the substrate, such as warping, checking and premature failure. Always check with the substrate supplier prior to commencing any work to ensure colour selections fit within their guidelines. Resene also manufactures Resene CoolColour technology and this may increase the colour range that can be suitable over some heat sensitive substrates - refer Resene for further information.

Note 3: Tones listed above are subject to change if colours are reformulated.

Note 4: Colours with ( ) around them are alternative names for this colour.

Note 5: Colours may be available in selected products or sizes only. Check with Resene ColorShop or reseller staff to ensure your selected colour is available in the product and/or size you require.

Note 6: Colours marked with * have been matched to the equivalent COLORBOND® or COLORSTEEL® colour samples in 2009. If an exact match is required we recommend you check your chosen colour against the actual sample of the product prior to purchasing. COLORBOND® is a registered trademark of Bluescope Steel Limited. COLORSTEEL® is a registered trademark of New Zealand Steel Limited.

Note 7: This colour chart is finished with Resene SpaceCote Low Sheen waterborne enamel, a product ideally suited to kitchens, bathrooms and broadwall areas.
