GET THE LOOK

I took inspiration from the existing feature wallpaper in the lounge, using the colour on the cabinetry and repeating the pattern on the custom glass lightbox under the island, on the extraction unit, and on the custom wall unit. The orange splashback and toe kicks add warmth. Corian Organic Rain Cloud was chosen for the benchtops, as it complements the design and is also an easy-care surface.

You can call it retro or historical richness, but brilliant yellows, pumpkin oranges and tomato reds are the accent colours of the season. Mix them with pretty pastels for a colourful balance and you have the hottest colour trends for 2014. Think bold, luminous hues from your childhood paintbox – colours that provide the energy you need when you have a lot of cooking to get through. resene.co.nz
