

Resene masonry filler.

The quick, efficient way to get filled in.

Resene Masonry Filler is the quick, efficient way to get filled in. Quick because you **paint** it on, leaving it to make a smooth, even surface of cracked and cratered concrete walls. And efficient because

Resene Masonry filler combines the proven durability of Semi-Gloss Resene with carefully graded Mica particles, which overlap one another and bridge the ugliest gaps. Resene Masonry filler does

a job that in the past has only been achieved by expensive plaster coats. It's an innovation that has become an essential requirement in the building industry. The quick, efficient way to get filled in.
