

COLOUR TREND

A GREY AREA

White and grey cement, cretstone and beach sand give a positively monastic feel. While here it is the dominant feature, it's not without visual interest. Unexpected moments of lustre punctuate the pervasively ongoing matte, monotonal scheme, like an antique marble and gilt table. The muted palette allows seemingly incongruous elements coexist happily and accentuate each other.

BOLD BATHROOM

A mix of intense colours and concrete creates a dynamic contrast with dramatic, striking effect.

COCOONED IN COLOUR

Paint your place cosy yet daring with charcoals, moody blues and dense greens.

Deep light-absorbing colours offer cave-like cocoons to hide in when the world gets too scary. Creating places of introspection and security, deep Resene charcoals, moody blues and dense greens ground us but also inject a sense of daring at using such bold tones. It's safe but not predictable.

These Resene colours are soulful and intimate yet bring a hint of drama without resorting to the intensity and rigidity of black. Team with Resene wood stains and clear finishes to ground the look in nature.

The Resene colour collection includes the latest designer paint hues to dress your home. Available from Resene ColorShops and resellers. resene.co.nz/colorshops; 0800 737 363. Please view a physical Resene colour sample before making your final choice.
