

★★★ Difficulty level ★ easy ★★ moderate ★★★ challenging

Weekend DIY with Mark Rayner – 44

Follow our simple guide to revamping a shed roof using Resene Summit Roof paint.

### You will need:

- Bucket
- Garden hose with clean running water
- Garden sprayer
- Mineral turpentine
- Paintbrush
- Paint stirrer
- Resene Moss & Mould Killer
- Resene Paint Pot
- Resene Paint Prep and Housewash
- Resene paint stirrer
- Resene Rust-Arrest
- Resene Summit Roof tinted to Resene Sponge
- Sandpaper or wire brush
- Stiff-bristled brush

#### Step one

Mix one part Resene Moss & Mould Killer to five parts clean water and fill the garden sprayer with the diluted solution. Spray the shed roof with the solution and leave for 48 hours.

#### Step two

Mix one part Resene Paint Prep and Housewash to three parts water.

#### Step three

Scrub the roof vigorously with the solution using a stiff-bristled brush and rinse thoroughly with clean water. Allow to dry.

#### Step four

Remove any areas of rust with sandpaper or a wire brush and spot prime with Resene Rust-Arrest. Allow to dry.

#### Step five

Clean brush with mineral turpentine.

#### Step six

Apply one coat of Resene GP Metal Primer to the roof and allow to dry. Again, clean brush with mineral turpentine.

#### Step seven

Carefully stir the Resene Summit Roof paint.

#### Step eight

Apply two coats of Resene Summit Roof paint to the roof, allowing at least two hours between coats.

To get the look: Mark painted the rest of the shed with Resene Lumbersider tinted to Resene Tranquil.

#### Other ideas:

For a dark green effect paint the shed roof with Resene Summit Roof tinted to Resene Karaka.
