

Naturally beautiful with Resene Aquaclear Natural

There's a definite trend to natural timber finishes in interiors for floors and ceilings. It can be tempting to leave them uncoated, but that leaves the timber prone to wear and tear, dust and contaminants that can be impossible to remove later.

With Resene Aquaclear Natural you can apply a flat waterborne clear finish that protects the timber while still allowing its natural beauty to show through. Resene Aquaclear Natural is designed for interior timber walls and ceilings to enhance and protect timber from everyday wear and tear. The flat finish helps the timber retain its natural just cut look.

If a little colour rejuvenation is needed, Resene Colorwood Enhance may be added to Resene Aquaclear Natural to add extra depth and colour.

Resene Aquaclear is also available in satin, semi-gloss and gloss finishes for those looking for a higher sheen effect.

Complete the look and finish your timber flooring with durable Resene ProSelect or Resene Qristal ClearFloor.
