Reese AquaLAQ NGR Primer Sealer is a single pack solventborne non grain raising primer designed for kitchens, shop fittings and furniture finishing. Designed for easy overcoating with Reese AquaLAQ Colour Coat. The rheology of Reese AquaLAQ minimises application problems.

Preparation

- Ensure substrates to be coated are in sound condition, dry, free from dirt, dust, loose material, oil (including mineral oil based wood finishes or similar), and salt.
- All standing materials must be harmless and appropriate protection must be worn. In particular dusts from old lead or chromate compounds, particulate dusts from old lead or chromate compounds, asbestos, and chromium(VI) should be avoided. In instances where the presence of these materials is suspected, appropriate protection must be worn. In instances where the presence of these materials is suspected, appropriate protection must be worn.
- For new work ensure the surface is sanded with a smooth finish and dusted off. Round all sharp edges.
- Ensure humidity is less than 65% and temperature 15-25˚C for ideal application and curing. Poor ventilation is liable to drop below this during the drying period.
- Maintain good ventilation throughout the drying system. Multiple air changes are required during application and post application curing period to ensure the paint is properly cured. This may require use of an extraction system. Multiple air changes are required during application and post application curing period to ensure the paint is properly cured. This may require use of an extraction system.
- Ensure product container or label is properly cured. This may require use of an extraction system. Multiple air changes are required during application and post application curing period to ensure the paint is properly cured. This may require use of an extraction system.
- Always wear protective clothing and eye and face protection. Take action to prevent static discharge. Avoid release to the environment. Obtain fire extinguishing agents appropriate to the agent. The risk of fire or explosion should be considered. Do not use or store this product in an environment where explosive dusts, gases, vapours or mists may be present.

Recoat time (minimum)

- 2 hours.
- 30 minutes. Do not apply at temperatures liable to drop below this during the drying period.
- 30 minutes. Do not apply at temperatures liable to drop below this during the drying period.

Touch dry

- Touch dry 10-15 minutes.

Dry time (minimum)

- Dry time 15-19 hours.

SAFETY PRECAUTIONS

- All persons working on site should always wear protection glasses or goggles, to avoid eye irritation. May cause burns. May cause damage to organs through ingestion or repeated exposure. Use non-sparking tools. Take action to prevent static discharge. Avoid release to the environment. Obtain fire extinguishing agents appropriate to the agent. The risk of fire or explosion should be considered. Do not use or store this product in an environment where explosive dusts, gases, vapours or mists may be present.

- FLAMMABLE LIQUID AND VAPOUR

- Keep out of reach of children.

- Keep away from heat, sparks, open flames and other ignition sources.

- No smoking.

- No open flames and other ignition sources.

- No smoking.
