Resene ArmourCote 510 L.T. HARDENER

Resene ArmourCote 510 is a high performance, self-grinding epoxy mastic combining superb adhesion with true barrier properties. Will tolerate compromised surfaces such as handiwork, inclusions and other substrate imperfections. See Data Sheet RA40 for technical information.

General:
- Safety Data Sheet (SDS) is available and must be consulted prior to use.
- In every case it is recommended that the current Resene Data Sheet is consulted for product data and surface preparation information.
- This product comprises a Base and Hardener, which must be mixed in the required ratio using an air-assisted power mixer before application. Mix each component separately before blending them together. Add the total contents of the Hardener container to the total contents of the Base container. Dress uniformly mixed, allow to stand for the recommended induction time prior to rolling and use.
- Rolling requirements may vary according to application method, equipment and environmental conditions.
- If thinning is required add recommended thinner after components have been blended and thoroughly re-mixed using the power mixer.
- Ensure correct wet film thickness is applied to the substrate. Resene ArmourCote dry film thickness. Allowance must be made for any thinner added.
- Use of thinner/resin may have an adverse effect on application and performance.
- Drying is affected by low temperatures and high humidity.
- Ensure that the mixed product is used within the stated pot life. The pot life of the mixed product is given for a specific temperature. Higher temperatures will reduce the pot life of the product inversely. When the product is used at lower temperatures it will extend the pot life.
- The temperature of the substrate should be at the above the "Dew Point".
- The "Dew Point" requirement can be presumed to be satisfied if a thin clearly defined film of water will not form above the "Dew Point".
- Induction time: 10 minutes.
- Recoat time (minimum): 1-2 hours at 21˚C. 3-4 hours at 10˚C.
- Always follow the manufacturer's recommendations.

For full instructions on minimising the impact of your decorating project on the environment see the Resene website.

DRINK OR SMOKE WHILE USING.

PRECAUTIONS

Inhaling paint fumes may cause irritation of the lungs and lower respiratory tract. Long exposure to paint fumes may cause respiratory symptoms. Paint fumes cause irritation of the eyes and skin. Paint fumes are potentially toxic to the liver, kidneys, and central nervous system. Paint fumes are believed to be genotoxic and may have an adverse effect on reproduction. Exposure to paint fumes may cause organ damage through metabolism through the liver. See your doctor for further advice.

Read label before use. Keep out of reach of children. May be harmful if swallowed. Inhaling paint fumes may cause irritation of the lungs and lower respiratory tract. For use as a decorative/protective coating.

CONTAINS: Xylene 65-140 gms/L, Ethylbenzene 10-65 gms/L, Benzyl Alcohol 140-200 gms/L.

Resene Data Sheet: RA40.

Cleaning Paint Equipment:
- Wear appropriate protective clothing. Absorb with sand or earth. Collect in suitable noncombustible containers.
- Clean up with water, if present and easy to do so. Continue rinsing. If eye irritation persists: Get medical advice or attention.
- IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses if present and easy to do so. Continue rinsing.
- IF SWALLOWED: Immediately call a POISON CENTRE, doctor, physician or first aider.

FIRE:
- Use foam, carbon dioxide or dry chemical powder.

Thinner:
- This product may be used to paint a wide variety of substrates. Contact Resene ColourShop or Reseller for your nearest Technical Representative.

For use when application temperatures are close to or below 10°C. Epoxies and polyaminoamides have been known to cause dermatitis and epidermoclinia so avoid direct skin contact should be taken.

For use when application temperatures are close to or below 10°C. Epoxies and polyaminoamides have been known to cause dermatitis and epidermoclinia so avoid direct skin contact should be taken.

Keep Resene Paste up or in a cool, dry place away from heat. Paint is not shelf stable.

When seeking medical advice take this container with you.

If exposed or concerned:
- Get medical advice or attention.
- IF IN CONTACT WITH EYES: Immediately flush with water for at least 15 minutes. Consult physician or first aider.
