Armourcote 512
epoxy enamel
gloss base
Engineered Coating Systems
Resene Armourcote 512 is a high build, gloss epoxy finish that protects concrete and metals against corrosion and chemical degradation. Fully cured film is hard and abrasion resistant.

**General**
- Safety Data Sheet (SDS) is available and must be consulted before use.
- In every case it is recommended that the current Resene Data Sheet is consulted for product data and surface preparation information.
- This product must be thoroughly mixed before use. Efficient mixing at all stages requires power mixing with an air or explosion proof mixer until uniformly blended.
- Thinning requirements may vary according to application method, equipment and environmental conditions.
- If thinning is required thoroughly re-mix using the power mixer.
- Ensure correct wet film thickness is applied to achieve desired dry film thickness. Allowance must be made for any thinner added.
- Use of incorrect thinner may have an adverse effect on application and performance.
- Drying is affected by low temperatures and high humidity.
- The temperature of the substrate should be 3°C above the “Dew Point”.
- The “Dew Point” requirement can be presumed to be satisfied if a thin clearly defined film of water applied to the cleaned surface with a damp cloth evaporates within 15 minutes.
- Following appropriate preparation, all surfaces must be dry and clean prior to painting.

**Practical applications**
- This product may be used to paint a wide variety of surfaces. If the surface you propose to paint is unsound or not referred to, contact your local Resene ColorShop or Reseller for your nearest Technical Representative.

**Be PaintWise**
For tips on minimising the impact of your decorating on the environment see the Resene website.
