Resene Armourcote 821 HARDENER

Resene Armourcote 821 combines the performance properties of a quality inhibitive epoxy primer with the convenience of brush or roller application. Suitable for priming both new and existing steel, concrete, polymer modified concrete, masonry, asbestos, exposed aggregate concrete, roofing, tanks to aquatic life, tents to aquatic life with long-term durability.

Contents: 800 ml net volume.

Mixing ratio: 4 parts Base: 1 part Hardener.

Pot life: 3 hours at 21°C. Increased pot life, conversely lower temperatures will increase it.

Theoretical coverage: 4 litres at 20 microns D.F.T., 5 square metres.

Touch dry: 2 hours.

Drainage time: 9 square metres.

Recommended surface preparation: Use of the correct surface preparation is essential to ensure optimal results. Substitution may cause substandard results or not accept any responsibility for the application or performance.

Application hardener and base separately before blending them together. Add the total contents of the Hardener container to the total contents of the Base container.

General

Safety Data Sheet (SDS) is available and must be consulted before use.

In every case it is recommended that the current Resene Data Sheet is consulted for product data and surface preparation information.

This product comprises a Base and Hardener, which must be mixed in the required ratio using air or an airless spray pump mixer before application. Mix each component separately before blending them together. Add the total contents of the Hardener container to the total contents of the Base container.

Resene Data Sheet: RA37.

Manufactured under a quality system certified to the ISO 9001:2000 standard. Email as an unread attachment to the Resene Colour Shop on reply@resene.co.nz or visit the Resene website.

In every case it is recommended that the appropriate Data Sheet and Safety Data Sheet are consulted prior to application.

Resene Armourcote 821 is a two component solventborne and waterborne polyurethanes, such as Resene Uracryl 400/800 Series topcoats. Primer for new or maintenance work.

• Use of incorrect thinner may have an adverse effect on application and performance.

• Drying is affected by low temperatures and high humidity. Ensure that the mixed product is applied to the cleaned surface within 15 minutes.

• The temperature of the substrate should be 3˚C above the “Dry Point”.

• The “Dry Point” requirement can be presumed to be satisfied if a thin clearly defined film of water applied to the cleaned surface with a damp cloth evaporates within 15 minutes.

• If exposed or concerned get medical advice or attention.

• If you feel unwell, get medical attention.

• When seeking medical advice take this container with you.

• If inhaled, remove person to fresh air and keep comfortable for 15 minutes.

• If in eyes, rinse cautiously with water for several minutes.

• If in skin, wash with plenty of soap and water (or alcohol) if not encouraged by medical advice or authority. Take off contaminated clothing and wash before reuse.

• If by mouth, rinse mouth and drink 1-2 glasses of water for several minutes. Remove contact lenses if present and seek medical advice. Continue rinsing if irritation persists after medical advice or authority.

• IF INHALED: Remove person to fresh air and keep constant for breathing. If experiencing respiratory symptoms call a POISON CENTRE or doctor, physician, first aider.

• Get medical attention of you feel unwell.

• In case of fire use water spray to cool container and to smother flame.

• Avoid inhalation of mists, vapours or sprays. Do not eat, drink or smoke while using.

• Avoid breathing MISTS, VAPOURS OR SPRAYS. DO NOT EAT, DRINK OR SMOKE WHILE USING.

• When seeking medical advice take this container with you.

• In case of fire use water spray.

• Air dry before use.

• Avoid release to the environment. Dispose of empty container safely. Consult Resene Colour Shop on reply@resene.co.nz or visit the Resene website for a copy.

• For best results, always use a Resene Armourcote 821 primer and Armourcote 821 topcoat to achieve optimal results.

• Ensure that use of this product is compatible with the substrates and surface preparation method and that the application methods are consistent with the application methods and preparation procedures recommended by the manufacturer.

• Do not enter into any drain, ditch, or river to enter any drains. Refer to your local Council for disposal of dirty thinner.
