SAFETY PRECAUTIONS
Read label before use. Keep out of reach of children. May cause damage to organs through prolonged or repeated exposure.

PRECAUTIONS
AVOID BREATHING DUST, FUMES, GAS, MISTS, VAPOURS, SPRAYS.
Store in original or correctly labelled container, tightly closed, in a well ventilated area indoors, away from foodstuffs, either between 15ºC-20ºC or at a cool, constant temperature. Dispose of empty container safely. Consult Resene checklist on environmentally acceptable methods for cleaning equipment and disposing of unwanted paint.

FIRST AID
IF SWALLOWED: Immediately call a POISON CENTRE, doctor, physician or first aider.
IF ON SKIN (or hair): Rinse skin with plenty of soap and water. If skin irritation or rash occurs: Get medical advice or attention.
IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses if present and easy to do so. Continue rinsing. If eye irritation persists: Get medical advice or attention.
IF INHALED: if breathing is difficult, remove to fresh air and keep at rest in a position comfortable for breathing. If exposed or concerned: Get medical advice or attention. When seeking medical advice take this container with you.
Further information can be obtained from
AUST: POISONS INFORMATION CENTRE 131 126
or call Resene 1800 738 383.
NZ: NATIONAL POISONS CENTRE 0800 POISON (764 766) or call Resene 0800 737 363.
CONTAINS: Diethylene Glycol Monobutyl Ether 10-110 gms/L.

SPILLS
Absorb with sand or earth. Collect and seal in properly labelled drums. Do not allow to run off into waterways.

Resene Brushing Additive is especially formulated for addition to Resene waterborne enamel paints to reduce brush marking and produce a smoother finish on trim and joinery.
- Warm, dry conditions and hot surfaces result in too rapid drying of waterborne paints. This may lead to excessive foaming on application and generally poor application properties such as short wet edge times and impaired levelling.
- Resene Brushing Additive additions of 2%-5% will generally improve most application problems caused by too rapid drying. In more severe cases more Resene Brushing Additive is beneficial. Do not use more than 5% (200ml per 4 litres). Do not use with Resene Hot Weather Additive.
- Caution: Higher levels of Resene Brushing Additive can reduce film build properties. This may show up as a tendency to run and sag and may make it harder to achieve recommended spreading rates.
- Normal recommended dosages of Resene Brushing Additive are as per the table below. One capful = 10ml.

<table>
