Ceiling Paint

waterborne flat

white

low odour

KEEP OUT OF REACH OF CHILDREN

Ceiling Paint is recommended for use on ceilings of living rooms, bedrooms, and dining rooms where a flat finish is required. It is a very low yellow, low voc, low voc product.

Preparation
- Surfaces that are sound, thoroughly sanded, dry and free from dust, dirt and loose material.
- Fill any cracks, and putty stains with Resene Mould & Mould Filler (see Data Sheet D50). Open joints and crevice stains should be removed using either Resene Enamifiable Solvent Cleaner (see Data Sheet D50) or sugar soap. Any loose, powdery or stained material must be removed.
- Where staining is present the surface must be removed.
- Any cracks or holes in the ceiling must be filled with Resene Mould & Mould Filler (see Data Sheet D50). Open joints and crevice stains should be removed using either Resene Enamifiable Solvent Cleaner (see Data Sheet D50) or sugar soap. Any loose, powdery or stained material must be removed.
- Where staining is present the surface must be removed.

Application
- Resene Ceiling Paint is not designed for use on ceilings that contain asbestos.
- Before using any paint on ceiling, refer to the Resene website, or call Resene 0800 737 363.
- In certain circumstances a second coat may be necessary, in this case allow at least two hours between coats.
- Maintain good ventilation throughout the drying and application curing periods. Do not apply the paint to a freshly painted surface. Do not allow the paint to come into contact with any of the topcoats. Use Resene Sureseal if the surface is water stained or has yellowed due to prolonged exposure to sunlight. Use Resene StainLock (see Data Sheet D408) if the surface is water stained or has yellowed due to prolonged exposure to sunlight. For more information, see the Resene website.
- The surface you propose to paint is unsound or not referred to, try a test area first. Use Resene Sureseal or Resene StainLock (see Data Sheet D408) followed by lining paper is recommended in critical lighting areas.
- If mould is present, treat with Resene Moss & Mould Killer (see Data Sheet D80). Use Resene Sureseal if the surface is water stained or has yellowed due to prolonged exposure to sunlight. Use Resene StainLock (see Data Sheet D408) if the surface is water stained or has yellowed due to prolonged exposure to sunlight. For more information, see the Resene website.

First Aid
- If Swallowed: Rinse mouth. Call a POISON CENTRE or doctor. If you feel unwell. Do not drink water. Take all contaminated clothing and wash before reuse. Wear appropriate protective clothing. Absorb with sand and disperse. Dispose of wash-up water onto grassy/unsealed area or disposal. Consult Resene checklist on environmentally acceptable methods of cleaning equipment and materials is suspected.
- If Inhaled: Remove from exposure. Keep calm. If you feel unwell, call Resene 0800 737 363.
- If eye irritation persists: Get medical attention/advice. If eye contact occurs, remove contact lenses, if present and easy to do so. Continue rinsing. If eye irritation persists, seek medical attention.

Maintenance
- (after a minimum of four weeks' drying)
- If used on ceilings in critical lighting areas.

Be PaintWise
- For tips on minimizing the impact of your decorating on the environment see the Resene website.

For technical instructions see Data Sheet D305.

Specifications
- Paint contains with water for several minutes. Remove contact lenses, if present and easy to do so. Continue rinsing. If eye irritation persists, seek medical attention.
