ClinicalCote
low odour
washable finish
waterborne interior

With Anti-Microbial Silver

KEEP OUT OF REACH OF CHILDREN
SAFETY PRECAUTIONS
Read label before use. Keep out of reach of children. This material is quite bland; with vapour, occasional skin contact and even minor ingestion having negligible hazard. Repeated skin contact and any eye contact will cause irritation. Harmful to aquatic life with long lasting effects.

PRECAUTIONS
USE WITH ADEQUATE VENTILATION. DO NOT DO, DRINK OR SMOKE WHILE USING. Store in original or correctly labelled container, tightly closed, in a well ventilated area indoors, away from foodstuffs, an ambient temperature and avoid freezing conditions. Avoid release to the environment.

FIRST AID
IF SWALLOWED: Rinse mouth. Call a POISON CENTRE, doctor or physician if you feel unwell.
IF ON SKIN (or hair): Rinse skin with plenty of soap and water. If skin irritation or rash occurs get medical advice or attention.
IF IN EYES: Rinse cautiously with water for several minutes. Continue rinsing. If eye irritation persists get medical advice or attention.

SAFETY PRECAUTIONS
Mix the Resene ClinicalCote with water. Brush/roll out the paint and when the surface is water stained or has yellowed due to prolonged exposure to sunlight.
All surfaces (except timber) which are highly absorbent, in poor condition, affected by efflorescence, friable, powdery or chalky must be primed with Resene Sureseal.
Repaints – spot prime all bare areas with the same primer shown for new work and proceed as for new work.
Sound cementitious surfaces do not normally require a primer. Check wallpaper type before painting. Coat a small inconspicuous area with the Resene topcoat paint and colour to be used. Wait at least 2 weeks, wipe down with water and a cloth and check for surface tack. If the painted area is tacky, apply Resene Vinyl Wallpaper Sealer (see Data Sheet D406) prior to application of Resene topcoat paints.

Application
Apply two coats in the required colour allowing at least two hours between coats.
Final sheen finish will develop over several days as the paint hardens.

Maintain good ventilation throughout the drying and curing period to ensure the paint is properly cured. Poor ventilation may inhibit curing and performance.

Maintenance
(after a minimum of seven days’ drying)
See the Resene Caring for your paint finish brochure or the Resene website for cleaning instructions.

Be PaintWise
For tips on responsible disposal of paint, cleaning equipment and minimising the impact of your decorating on the environment see the Resene website. Do not discharge any paint into the environment. Resene PaintWise (NZ) or paintback.com.au see the Resene website. Do not apply under damp conditions.

Coverage: 11 square metres per litre per coat. The spreading rate recommended for this product will achieve hiding in coats for most colours. Increased spreading rates can be used but additional coats may be needed to achieve hiding. See the Resene website for more information.

Dry time (minimum): 45 minutes. Do not apply at temperatures below 10°C or when temperatures are liable to drop below this during the drying period. Drying is slowed by low temperatures and high humidity. Do not apply under damp conditions.

Recoat time (minimum): 2 hours. Primer required: Dependent on surface. Usual number of coats: Two. Bright colours may require an additional coat.

Application method: Brush, speed brush, roller or spray.
Thinning: In hot conditions may be thinned with up to 5% Resene Hot Weather Additive to slow drying.
Clean up: Water.
Colour range: Selected Resene Total Colour System including BS5252, Multi-finish, Whites & Neutrals and The Range.

Quick check

Enjoy the Resene Promise of quality on premium paints. See your Resene ColorShop or the Resene website for a copy. In every case it is recommended that the appropriate Data Sheet and Safety Data Sheet are consulted prior to application.

Please ensure that use of this product is compatible with the substrate and surface preparation method and that the coating will withstand any exposure to which it may be subject. When using multiple packs of this product on the same project please mix them together before use. Resene does not accept any responsibility for the application of incorrect products to substrate or the application of incorrect colours. Resene products are designed to be used as a system for optimal results. Substitution may cause substandard results or system failure. For further painting advice and information, call 1800 738 383 (AUS), 0800 737 363 (NZ) or visit the Resene website.
