Creating unique broken, antique looking finishes is quick and easy with FX Resene Crackle.

- Simply brush apply one coat of your chosen tinted acrylic basecoat (such as Resene Lumbersider) onto the surface you wish to coat at a spreading rate of 10 square metres per litre and allow to dry. Do not use a waterborne enamel as the basecoat or topcoat as the FX Resene Crackle only works with standard acrylic finishes.
- Apply one coat of FX Resene Crackle and allow to dry. Dry time is generally 30-40 minutes depending on temperature and humidity. Allow at least two hours before recoating.
- Apply one coat of an acrylic topcoat tinted to a contrasting colour to the basecoat. FX Resene Crackle will cause the topcoat to shrink and crack revealing the basecoat colour.
- If a clear overcoat is desired, use a product from the Resene Qristal Clear range as a waterborne polyurethane may react with the effect.
- The crackle effect will vary depending on the application method, basecoat and topcoat used. Always try out a sample panel before starting the project.
- Crackle effect finishes are best used on uneven or rough walls, furniture, picture frames, woodwork and small feature areas. Interior use only.

SAFETY PRECAUTIONS
Causes serious eye irritation.
Causes skin irritation.

PRECAUTIONS
Wear protective gloves, clothing, face and eye protection.

FIRST AID
IF ON SKIN (or hair): Rinse skin with plenty of soap and water. If skin irritation or rash occurs get medical advice or attention. Take off contaminated clothing and wash before reuse.
IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do so. If eye irritation persists get medical advice or attention.

IF INHALED: Remove to fresh air. If not improving get medical advice or attention.

IF SWALLOWED: Rinse mouth. Drink plenty of water. Do not induce vomiting unless instructed to do so. If symptoms persist get medical advice or attention.
